From This Institution

About 50 Per Cent of Logs Used in Manufacture of Paper
by the Local Mill is Cut on the Banks of
the Mississippi River

PREAMBLE

This is the 14th of a series of fifteen industrial articles which will be published in the Dispatch, one each week for the next 15 weeks, for the purpose of outlining to our local people and the outside world the vast field of resources and opportunities existing here for advancement and success and for the promotion of optimism and the right psychology. The facts contained in these articles are absolutely reliable and gathered by expert publicists who have had many years experience in the business.

The Dispatch, throughout this period, will make an effort to show that there is not a section of the country in the West or the Northwest that offers a wider field of endeavor than Crow Wing county. Every phase of industrial life and business activity will be covered in a thorough and constructive manner.

The carrying out of this campaign has been made possible by many of the leading business institutions of Brainerd, one of the leading commercial centers of the state and located in a banner county. After reading this article turn to the industrial pages and see who those progressive firms are which so willingly have come to the assistance of this enterprise.

Every reader of the Dispatch can assist very materially in the campaign by sending his own copy of the paper to a relative or friend in some other section of the country after he has completed reading it, that this relative or friend may learn of the opportunities in this splendidly productive section.

BRAINERD DISPATCH COMPANY

By R. KENNETH EVANS

In ancient Babylonian days when public documents were in the form of rude bricks with word symbols scratched upon them, learning of any sort was confined to a select few. Without the aid of paper to spread the knowledge of the world the present generation would still be floundering in ignorance such as prevailed in Medieval times. The art of making paper has long been known, the "papyrus" of the Egyptians being the first form of paper known to history. For century upon century, however, this art lay largely dormant and it has been comparatively recently, as time is measured by the ages, that the use and manufacture of it has become wide spread.

Without a suitable material upon which to make its impressions, the printing industry would never have developed to the position it now holds. If all the paper in the world were suddenly to be destroyed, in spite of our swift means of communication general dissemination of news and knowledge would have to largely proceed by word of mouth.

The business of the world today is done on paper. Because of the cheapness and the plentifulness of its manufacture it is regarded lightly and the term "scrap of paper" is a very synonym for worthlessness and cheapness. Let us not regard it too lightly however. Without it, the great educational medium of the present day, the newspaper, would be an impossibility, and the arrangement of business transactions become a cumbersome thing.

Brainerd lies in the heart of one of the great manufacturing regions of this ever present world commodity. Except for the finer grades of paper which are made from rags, the great bulk of paper is made from wood pulp. The vast spruce forests of the "north woods" supply this need of wood pulp and here has developed one of the major divisions of the industry.

One of the largest industries in Brainerd is constituted in the plant of the Northwest Paper company located a short distance from the city up the Mississippi river. This plant is one of the important units in this industry and its location in Brainerd is one of the best evidences of this city's standing as a commercial and industrial center for central Minnesota.

The local plant manufactures news print exclusively, that is, the kind of paper upon which newspapers are printed. The Daily Dispatch buys all of its paper from this institution and the sheet you are holding was manufactured in the plant of the Northwest Paper company. The pulp formed from the spruce is taken in a liquid state and in thirty minutes after passing through the various operations emerges from the last machine in the form of finished newsprint. A description of the interesting processes of manufacture is given below for the reason that so few people outside of the industry know the slightest thing about the manner in which paper is made.

Processes of Manufacture

About fifty per cent of the logs used in the manufacture of paper by the local mill is cut on the banks of

the upper Mississippi river among the spruce forests there and floated down the river to the mill. The Northwest Paper company has developed the "floatage" right for a distance of several miles up the river from the plant. During the logging season this company maintains steam and other power boats on the river where the men eat and sleep. The entire distance of fourteen miles up the river is "boomed off."

The logs shipped to the mill by rail are also placed in the river in order that they may receive the thorough soaking which is necessary before the "barking" process, when all the bark is removed. Spur tracks lead up through the grounds from the main line of the Northern Pacific railroad.

In the first step of preparing the logs for conversion into paper they are conveyed to the "barking" rooms by means of a V-shaped trough conveyor. Here they are first sawed into two foot lengths by the saw slashers before they are conveyed into the "Paulson Barking Drum." This drum is a large cylindrical arrangement of steel strips with the appearance of lattice work. When the drum revolves the logs rub against each other and against the sharp edges of the sides of the drum which very effectively removes the bark. This loose bark drops through the open lattice work of the drum and into a refuse conveyor, located in the basement. This carries it to the yards where it is hauled away to be used either as filling or as fuel. From the open end of the drum the "barked" logs are taken by another conveyor to the block room, located in the grinding room, from which place they are trucked to the grinders. The trucks carry a fourth of a cord at each load and every truck load is carefully checked so that it may be seen how much each shift is doing as well as to keep an accurate count of the number of cords ground.

The "barking" drum, mentioned above, has a capacity of one hundred cords every nine hours. The grinders cannot handle such a large amount, consequently a switch is placed in the conveyor leading to the grinding room and when it has been filled to the capacity for a single day, the conveyor is thrown and the logs taken into the yards where they are stored for winter use, when logs can

MYSTERY SHROUDS FIRST GLAND THEFT IN CAPITAL CITY

ST. PAUL DETECTIVES WRESTLE
TO SOLVE THE PROBLEM
PRESENTED

MAN INJURED GAVE TWO NAMES,
ADDRESS GIVEN IS NOT
VERIFIED

(By United Press)

St. Paul, July 16.—St. Paul detectives wrestled today with their first gland robbery case.

Only one thing was definitely established—the man is in Ancker hospital with one gland gone and the other mutilated and threatened with blood poisoning as the result of a gland operation.

The rest of the story is mystery. The man staggered into police quarters early today and told of being attacked by two men with a knife. He broke away and fled as they slashed him, he said.

His name he gave as John Obronski. No such address as he gave as his residence can be found. Later he said his name was Levinsky, but the police found no such address as he gave under that name. He said he is married, but no wife showed up to claim him, nor anyone else to identify him.

Police held to the theory that the man is concealing his identity, and that he was attacked for revenge, possibly after an affair with some woman.

GOVERNOR PREUS AT WHEAT CONFERENCE

(By United Press)

St. Paul, July 16.—Governor J. A. O. Preus will attend a wheat conference if one is called by Governor Davis of Kansas, he said today.

As to the advisability of urging the farmers to a selling strike in an effort to keep up the price of wheat the governor would not commit himself.

"I would be glad to attend such a conference," was all he would say.

FARMERS SEEK TO BOLSTER UP PRICE

Wichita, Kans., July 16.—Concerted action by farmers to bolster up the price of wheat was sought today at a conference of representatives of five hard-wheat producing states.

The suggestion of Governor Jonathan Davis of Kansas that the farmers wage a "sellers' strike" was considered by delegates.

Farm clubs, granges, co-operative associations and other farm organizations of Kansas, Texas, Oklahoma, Nebraska and Colorado were represented at the meeting. The conference was on call of John A. Whitehurst, secretary of the Oklahoma Board of Agriculture.

WHEAT KEEPS ON FALLING IN CHICAGO

Chicago, July 16.—Wheat prices continued to fall steadily on the Chicago Board of Trade today.

After opening at 98c July futures closed at 97. September deliveries closed at 96½ and December at 99 7-8, the latter falling below \$1.00 for the first time during the present break. These prices are new lows since 1914.

BRITISH CLAIM CREW HAS DESERTERS

London, July 16.—Twenty-five members of the crew of the United States Shipping Board steamer Leviathan were summoned today by British authorities for desertion from British ships, an Exchange telegram states. Complaints had been made by British operators that their crews had deserted in New York to join American vessels for higher pay.

COUNTRY GIRL IS ACCUSED OF MURDER OF EX-PRIZE FIGHTER

(By United Press)

Kansas City, Mo., July 16.—Miss Margaret Allister, a 21-year-old country girl, was held in jail here today accused of the murder of Paul Murdock, ex-prize fighter and saloon keeper, whom she loved.

Margaret said she feared that Murdock was going to give her up for his wife's sake.

As he lay dying on the sidewalk, Murdock said: "Run, honey, don't let the police catch you here."

U. S. STEEL TO PUT 8 HOUR DAY POLICY TO WORK IN 6 WKS.

GARY ANNOUNCES ABOLITION
OF 12 HOUR SHIFT WILL EX-
TEND OVER LONG PERIOD

OTHERS EXPECTED TO FOLLOW
SUIT, BEING 90 PER CENT
OF THE INDUSTRY

New York, July 16.—The United States Steel corporation is going to abandon the 12 hour day within six weeks. Ninety per cent of the industry will follow suit at the same time, and it is expected the 10 per cent will fall in line soon after.

Elbert H. Gary, who as chairman of the board of the United States Steel corporation, is the recognized spokesman of the industry, announced that a start will be made within six weeks in substituting the three shifts of eight hours each for the two 12 hour shifts in the steel plants of the nation.

Mr. Gary's announcement came as the conclusion of a long controversy over the 12 hour day, which has been growing warmer in recent weeks. It was only in the last week of May that the American Iron and Steel Institute, of which Mr. Gary is a director and the most influential figure, made its report that the 12 hour day could not be ended until there was "a surplus of labor available."

The report was the answer to the request of President Harding a number of months previous that the steel industry find some means of ending the 12 hour day. After an investigation the committee appointed, headed by Judge Gary, defended the 12 hour day as less arduous than the eight hour day, and made a vague promise that as soon as "surplus labor" should be available the steel industry would be glad to make the change.

Mr. Gary was careful to point out that his announcement did not mean that the 12 hour day will be abolished entirely within six weeks throughout the industry.

Gary Explains Announcement
Speaking through his secretary, Judge Gary said:

"We shall probably commence actively taking steps to reduce the number of 12 hour workers," nor would he estimate the number of workers who would be affected within the six weeks period.

Later confirming personally the statement made through his secretary, Mr. Gary said:

"Plans are now being developed. It will require a considerable length of time to complete the change.

"If I said I was going around the world next week, what would it mean. It would mean that I was going to start around the world next week. The actual trip would take a much longer time.

NEW LOW LEVELS IN CHICAGO WHEAT

Chicago, July 16.—Wheat prices again dropped to new record lows since 1914 on the Chicago Board of Trade today.

Prices were: July deliveries, 98c; September 97½; December \$1.00 3-8.

VOTING LIGHT IN CITY PRECINCTS, WEATHER IDEAL

BALANCE OF POWER IN THE U.
S. SENATE INVOLVED IN
ISSUE TODAY

MINNESOTA IS FOUNDATIONAL-
LY A REPUBLICAN STATE,
FIGURES GIVEN

(By United Press)

St. Paul, July 16.—Minnesota failed to take seriously today the task of picking a United States senator. Voting was light in city precincts, and in four of the largest polling places in the city the judges had nothing to do an hour after the polls opened.

A bright, cool morning made it an ideal day.

The nation at large was interested in the race between Johnson and Governor Preus to fill the vacancy caused by the death of the late Knute Nelson. The balance of power in the senate is involved.

The three candidates for the post are:

Jacob All Ottelson Preus, Republican nominee, governor of the state.

Magnus Johnson, Farmer-Labor nominee, Meeker county farmer and former legislator.

James A. Carley, Democratic nominee, Plainview lawyer and state senator.

Minnesota is foundationally a Republican state. Under normal conditions the Republican nomination would be equivalent to election.

Dissection in the Republican party, coupled with a wave of protest against deflation and national policies in the ranks of farmers and laborers has altered the case, and a "huge protest" is anticipated.

It was first felt last fall when Henrik Shipstead, Farmer-Labor nominee, was elected by a big majority over Frank B. Kellogg, the Republican junior senator.

Supporters of Magnus Johnson, picturesque Swedish character, contended the "progressive voters" are more powerful today than they were last fall, and Frank Pike, Farmer-Labor leader, predicted Johnson would win by a margin of from 40,000 to 70,000.

Hoping and praying for a big vote, Republicans refused to make any estimates of the outcome, but Charles R. Adams, Republican state chairman, said he believed Governor Preus would be elected by a "small majority."

John R. Donahue, Democratic chief, predicted that because of "troubles in the major parties" Jas. A. Carley would "go over by 20,000."

Political observers do not believe the total vote will reach 500,000 but believe a vote of around only 400,000 will be cast which would likely favor Magnus Johnson. Republicans have made a strenuous campaign, one of the most vigorous in the history of the state, to get out the vote. They apparently feel that Governor Preus will be defeated unless half a million votes or more are cast. The state has a total voting power of around 800,000.

Governor Preus and Magnus Johnson opposed each other on virtually the same basis in the race for the governorship last fall. Governor Preus was elected by a narrow margin, polling 309,956 against 295,479 for Johnson. The Democratic candidate, Edward Indrehus, polled 79,903 votes.

In the same election Dr. Henrik Shipstead, leader of Farmer-Labor forces and chief aide to Magnus Johnson today, polled 325,372 votes to 241,833 for Frank B. Kellogg, the Republican choice for senator. Anna Dickie Olsen, Democrat, polled 123,624 votes in that election.

Newspapers, special writers and his opponents have been poking fun at Magnus Johnson during the campaign. Johnson was born at Liljedahl, Sweden, went through the

BANDITS SHOOT DOWN AN AIRPLANE TO GET THE \$20,000 PAYROLL

(By United Press)

Lima, Peru, July 16.—Bandits yesterday shot down a low-flying airplane laden with a \$20,000 payroll. They were foiled when the daring aviator brought the disabled plane to earth after a sensational effort and escaped on foot, beating the modern pirates. The ship was driven by Lloyd Moore. He was rushing the money from Lima to Canete for payment of laborers working on a government irrigation project.

BRIDE OF 16 LOSES HER HOME ADDRESS

MRS. BETTY MURPHY WAITS AT
AUTHORITIES FOR SPOUSE
TO SHOW UP

(By United Press)

Kansas City, July 16.—Mrs. Betty Murphy, 16, a bride of three months, today waited at police headquarters under the care of the matron for her husband to show up and give her the address of their home.

Mrs. Murphy said her husband left her sitting in a restaurant Saturday afternoon while he went around the corner "to see a friend" and he never came back.

"He always took me home, and I never knew what street we lived on or what the address was," Mrs. Murphy said.

"I lived in Waco, Missouri, up to the time I was married, and then my parents opposed the match, so I can't return to their home."

U. S. POURS 180 BARRELS OF BEER INTO SEWER

Minneapolis, July 16.—While thirsty and perspiring onlookers watched and mourned late yesterday, federal prohibition agents led by H. L. Duncan, northwest prohibition chief, raided three places in St. Paul and emptied 180 barrels of beer into the sewer. First the raiders visited a place at 618 Como avenue, where 100 barrels of 5 per cent mixture were destroyed, then they went to the Spaulding hotel, 474 Wabasha street, where 50 barrels of "nearly real" stuff was seized. The third raid, later in the day, was at the Ambassador cafe, Fifth and St. Peter streets, where the raiding party found 30 barrels of "beer." Mr. Duncan said 10 warrants would be asked tomorrow, as result of the raids.

grade schools, became a glass-blower, and emigrated to America when 20 years old—after his parents died.

He worked first as a lumberjack in the saw mills of Wisconsin and Minnesota for three years, and put his savings into a \$15 an acre farm in Meeker county—now one of the richest and most modern farming communities in the state. He possesses one of the most modern farms in his community, and was the originator of the co-operative marketing movement among farmers of the Northwest. He switched from the Republican party to the Non-partisan League when it sprung up in Minnesota several years ago.

Proud of his Swedish ancestry, proud of his forceful if not academic manner of expressing himself vehemently in all matters, whether great or small, Johnson presents a most interesting figure. During his campaign the weather was mostly hot, and almost invariably he began his speeches by removing his collar and tie, and then informing the ladies in the audience that they need have no fear, he would "go no further."

He has a lump of muscle under his left ear which stretches down his neck. He is proud of informing his listeners that he got this carrying lumber on his left shoulder. This was one of his ways of bidding for the labor vote.

VOTING PICKS UP ALL OVER STATE BY NOON HOUR

SUPPORTERS OF GOV. PREUS
CLAIM TURNOUT IS IN HIS
FAVOR

WOMEN ARE VOTING HEAVILY
IN MINNEAPOLIS, BRAINERD
VOTE INCREASES

(By United Press)

St. Paul, July 16.—Voting picked up all over the state by noon today, and supporters of Governor J. A. O. Preus said the turnout was in his favor.

Minneapolis, considered the one big hope of Governor Preus, may cast a vote larger than that in the primary last month, voting up to noon indicated. Women were voting heavily.

Reports reaching Farmer-Labor headquarters from Ottertail, Redwood, Brown, Koochiching and Olmstead counties said the vote there was heavy. Farmers were flocking to rural precincts, the reports said. The bulk of the farmer vote, however, is expected this evening.

Extreme heat was holding down the vote in the cities this afternoon. The bright sun was shadowed only occasionally by fleecy clouds.

Some of the southern counties, considered to be Preus territory, reported voting light. Winona, Rice and Freeborn counties were among them.

ELECTION IN BRAINERD; HEAVIEST VOTE 2ND WARD

Voting at the general election today is considerably heavier than at the primary election of June 18th. The vote by precincts at two o'clock this afternoon was as follows:

1st ward: 73 votes cast, 15 being women.
2nd ward: 195 votes cast, 35 being women.
3rd ward, 1st precinct: 115 votes cast, 23 women.
3rd ward, 2nd precinct: 23 votes cast, 9 women.
4th ward: 94 votes cast, 16 women.
5th ward: 115 votes cast, 38 women.

The judges and clerks are as follows:

1st ward, judges: A. B. Anderson, George Anderson and Charles Ellison; clerks: James McManus, Andrew Ellingboe.

2nd ward, judges: E. A. Cooke, A. C. Smith and Mrs. A. C. Weber; clerks: Mrs. Gladys Niles, A. T. Fisher.

3rd ward, 1st precinct: Judges, Mrs. Margaret Herbert, W. R. Wilbur and Hugo Schwartzkopf; clerks, Mildred Dryburgh and Lillian Koyol.

3rd ward, 2nd precinct: Judges, Mrs. Mabel Kelly, Mrs. E. A. Thayer and N. W. Olson; Clerks, Beatrice Stearns and Mrs. Alice Peters.

4th ward: Judges, T. J. Lee, Goldie Lee and Charles Long; clerks, Volborg Hedstrom and Annie Olson.
5th ward: Judges, Mrs. Edith Bentley, Arthur Hagberg and J. B. Swisher; clerks, Goldie Holmstrom and Mrs. Ella Hillard.

GAS STRUCK IN WELL NEAR EASTON, MINN.

Albert Lea, Minn., July 16.—Land owners in the vicinity of Easton, Minn., are somewhat worked up over an occurrence at a well now down to a depth of 142 feet on the farm of John Remp. What is supposed to have been a gas pocket was struck, and the pressure shot water and gas high in the air for part of a day and all of one night. As the location is but 72 miles from where Rochester people are now drilling for oil, it has been determined to sink the well on the Remp farm to a much greater depth, in the hope of striking oil.

"We shall probably commence actively taking steps to reduce the number of 12 hour workers," nor would he estimate the number of workers who would be affected within the six weeks period.

Later confirming personally the statement made through his secretary, Mr. Gary said:

"Plans are now being developed. It will require a considerable length of time to complete the change."

"If I said I was going around the world next week, what would it mean. It would mean that I was going to start around the world next week. The actual trip would take a much longer time."

NEW LOW LEVELS IN CHICAGO WHEAT

Chicago, July 16.—Wheat prices again dropped to new record lows since 1914 on the Chicago Board of Trade today.

Prices were: July deliveries, 98c; September 97½; December \$1.00 3-8.

VOTING LIGHT IN CITY PRECINCTS, WEATHER IDEAL

BALANCE OF POWER IN THE U.
S. SENATE INVOLVED IN
ISSUE TODAY

MINNESOTA IS FOUNDATIONALLY
A REPUBLICAN STATE,
FIGURES GIVEN

(By United Press)
St. Paul, July 16.—Minnesota failed to take seriously today the task of picking a United States senator. Voting was light in city precincts, and in four of the largest polling places in the city the judges had nothing to do an hour after the polls opened. A bright, cool morning made it an ideal day.

The nation at large was interested in the race between Johnson and Governor Preus to fill the vacancy caused by the death of the late Knute Nelson. The balance of power in the senate is involved. The three candidates for the post are:

Jacob All Ottelson Preus, Republican nominee, governor of the state, Magnus Johnson, Farmer-Labor nominee, Meeker county farmer and former legislator. James A. Carley, Democratic nominee, Plainview lawyer and state senator.

Minnesota is foundationally a Republican state. Under normal conditions the Republican nomination would be equivalent to election.

Disaffection in the Republican party, coupled with a wave of protest against deflation and national policies in the ranks of farmers and laborers has altered the case, and a "huge protest" is anticipated.

It was first felt last fall when Henrik Shipstead, Farmer-Labor nominee, was elected by a big majority over Frank B. Kellogg, the Republican junior senator.

Supporters of Magnus Johnson, picturesque Swedish character, contended the "progressive voters" are more powerful today than they were last fall, and Frank Pike, Farmer-Labor leader, predicted Johnson would win by a margin of from 40,000 to 70,000.

Hoping and praying for a big vote, Republicans refused to make any estimates of the outcome, but Charles R. Adams, Republican state chairman, said he believed Governor Preus would be elected by a "small majority."

John R. Donahue, Democratic chief, predicted that because of "troubles in the major parties" Jas. A. Carley would "go over by 20,000."

Political observers do not believe the total vote will reach 500,000 but believe a vote of around 400,000 will be cast which would likely favor Magnus Johnson. Republicans have made a strenuous campaign, one of the most vigorous in the history of the state, to get out the vote. They apparently feel that Governor Preus will be defeated unless half a million votes or more are cast. The state has a total voting power of around 800,000.

Governor Preus and Magnus Johnson opposed each other on virtually the same basis in the race for the governorship last fall. Governor Preus was elected by a narrow margin, polling 309,956 against 295,479 for Johnson. The Democratic candidate, Edward Indrehus, polled 79,903 votes.

In the same election Dr. Henrik Shipstead, leader of Farmer-Labor forces and chief aide to Magnus Johnson today, polled 325,372 votes to 241,833 for Frank B. Kellogg, the Republican choice for senator. Anna Dickie Olsen, Democrat, polled 123,624 votes in that election.

Newspapers, special writers and his opponents have been poking fun at Magnus Johnson during the campaign. Johnson was born at Liljedahl, Sweden, went through the

BANDITS SHOOT DOWN AN AIRPLANE TO GET THE \$20,000 PAYROLL

(By United Press)
Lima, Peru, July 16.—Bandits yesterday shot down a low-flying airplane laden with a \$20,000 payroll. They were foiled when the daring aviator brought the disabled plane to earth after a sensational effort and escaped on foot, beating the modern pirates. The ship was driven by Lloyd Moore. He was rushing the money from Lima to Canete for payment of laborers working on a government irrigation project.

BRIDE OF 16 LOSES HER HOME ADDRESS

MRS. BETTY MURPHY WAITS AT
AUTHORITIES FOR SPOUSE
TO SHOW UP

(By United Press)
Kansas City, July 16.—Mrs. Betty Murphy, 16, a bride of three months, today waited at police headquarters under the care of the matron for her husband to show up and give her the address of their home.

Mrs. Murphy said her husband left her sitting in a restaurant Saturday afternoon while he went around the corner "to see a friend" and he never came back.

"He always took me home, and I never knew what street we lived on or what the address was," Mrs. Murphy said.

"I lived in Waco, Missouri, up to the time I was married, and then my parents opposed the match, so I can't return to their home."

U. S. POURS 180 BARRELS OF BEER INTO SEWER

Minneapolis, July 16.—While thirsty and perspiring onlookers watched and mourned late yesterday, federal prohibition agents led by H. L. Duncan, northwest prohibition chief, raided three places in St. Paul and emptied 180 barrels of beer into the sewer. First the raiders visited a place at 618 Como avenue, where 100 barrels of 5 per cent mixture were destroyed, then they went to the Spaulding hotel, 474 Wabasha street, where 50 barrels of "nearly real" stuff was seized. The third raid, later in the day, was at the Ambassador cafe, Fifth and St. Peter streets, where the raiding party found 30 barrels of "beer." Mr. Duncan said 10 warrants would be asked tomorrow, as result of the raids.

grade schools, became a glass-blower, and emigrated to America when 20 years old—after his parents died.

He worked first as a lumberjack in the saw mills of Wisconsin and Minnesota for three years, and put his savings into a \$15 an acre farm in Meeker county—now one of the richest and most modern farming communities in the state. He possesses one of the most modern farms in his community, and was the originator of the co-operative marketing movement among farmers of the Northwest. He switched from the Republican party to the Non-partisan League when it sprung up in Minnesota several years ago.

Proud of his Swedish ancestry, proud of his forceful if not academic manner of expressing himself vehemently in all matters, whether great or small, Johnson presents a most interesting figure. During his campaign the weather was mostly hot, and almost invariably he began his speeches by removing his collar and tie, and then informing the ladies in the audience that they need have no fear, he would "go no further."

He has a lump of muscle under his left ear which stretches down his neck. He is proud of informing his listeners that he got this carrying lumber on his left shoulder. This was one of his ways of bidding for the labor vote.

VOTING PICKS UP ALL OVER STATE BY NOON HOUR

SUPPORTERS OF GOV. PREUS
CLAIM TURNOUT IS IN HIS
FAVOR

WOMEN ARE VOTING HEAVILY
IN MINNEAPOLIS, BRAINERD
VOTE INCREASES

(By United Press)
St. Paul, July 16.—Voting picked up all over the state by noon today, and supporters of Governor J. A. O. Preus said the turnout was in his favor.

Minneapolis, considered the one big hope of Governor Preus, may cast a vote larger than that in the primary last month, voting up to noon indicated. Women were voting heavily.

Reports reaching Farmer-Labor headquarters from Ottotail, Redwood, Brown, Koochiching and Olmstead counties said the vote there was heavy. Farmers were flocking to rural precincts, the reports said. The bulk of the farmer vote, however, is expected this evening.

Extreme heat was holding down the vote in the cities this afternoon. The bright sun was shadowed only occasionally by fleecy clouds.

Some of the southern counties, considered to be Preus territory, reported voting light. Winona, Rice and Freeborn counties were among them.

ELECTION IN BRAINERD; HEAVIEST VOTE 2ND WARD

Voting at the general election today is considerably heavier than at the primary election of June 18th. The vote by precincts at two o'clock this afternoon was as follows:

1st ward: 73 votes cast, 15 being women.
2nd ward: 195 votes cast, 35 being women.
3rd ward, 1st precinct: 115 votes cast, 23 women.
3rd ward, 2nd precinct: 23 votes cast, 9 women.
4th ward: 94 votes cast, 16 women.
5th ward: 115 votes cast, 38 women.

The judges and clerks are as follows:

1st ward, judges: A. B. Anderson, George Anderson and Charles Ellison; clerks: James McManus, Andrew Ellingboe.

2nd ward, judges: E. A. Cooke, A. C. Smith and Mrs. A. C. Weber; clerks: Mrs. Gladys Niles, A. T. Fisher.

3rd ward, 1st precinct: judges, Mrs. Margaret Herbert, W. R. Wilbur and Hugo Schwartzkopf; clerks, Mildred Dryburgh and Lillian Koyiol.

3rd ward, 2nd precinct: judges, Mrs. Mabel Kelly, Mrs. E. A. Thayer and N. W. Olson; clerks, Beatrice Stearns and Mrs. Alice Peters.

4th ward: judges, T. J. Lee, Goldie Lee and Charles Long; clerks, Volborg Hedstrom and Annie Olson.

5th ward: judges, Mrs. Edith Bentley, Arthur Hagberg and J. B. Swisher; clerks, Goldie Holmstrom and Mrs. Ella Hillard.

GAS STRUCK IN WELL NEAR EASTON, MINN.

Albert Lea, Minn., July 16.—Land owners in the vicinity of Easton, Minn., are somewhat worked up over an occurrence at a well now down to a depth of 142 feet on the farm of John Remp. What is supposed to have been a gas pocket was struck, and the pressure shot water and gas high in the air for part of a day and all of one night. As the location is but 72 miles from where Rochester people are now drilling for oil, it has been determined to sink the well on the Remp farm to a much greater depth, in the hope of striking oil.

which they expect to spend in Bemidji and Itasca park.

W. S. Block, Deputy Commissioner of the Nicolett district of the Boy Scouts, stopped in the city this morning enroute to his home from the western part of the state.

A new dance pavilion built right on the lake at Crosby is having its grand opening on Tuesday July 17. The pavilion is in the vicinity of the armory.

VELVET ICE CREAM. The best pure cream, chief ingredient, Brainerd Creamery Co. Tel. 450.

Rev. and Mrs. George Walenta and children, Ruth and Madeline, leave this week for their new home in Maine. This change was made necessary by Rev. Walenta's health. During their short residence in the city the family have made many friends, who regret their leaving.

BUYS STUDIO HERE

O. L. Palmquist, Former Milaca Photographer, Acquires Swelland Business

O. L. Palmquist, former Milaca photographer, is the new proprietor of the Swelland studio in the Opsahl building on South Seventh street and is continuing the business under the old name. This change was made necessary in order that Mr. Swelland might take advantage of government vocational training which is due him through his army service.

Mr. Palmquist comes very highly recommended, with fifteen years of commercial photography experience to his credit. He is a married man, with eight children, and will move his family to the city as soon as a residence can be secured.

Mr. Swelland entered the business in 1913, as an apprentice to A. M. Opsahl, branching out for himself in the South Sixth street studio several years later. This one he disposed of when he was called into the army, at which time he was also leasing the Opsahl studio.

When the war was over, he re-established himself in the business. In the present quarters, with one of the most modern and up-to-date studios in this section of the state. He has always enjoyed a large patronage which he hopes will continue under the new management.

Mr. Swelland was disabled while in the army, and as the government has recently adjusted his claim and found him eligible for vocational training, he will take advantage of that opportunity, and has already moved to Minneapolis, where he will be stationed.

It is the plan of Mr. Palmquist to continue the policies of the former owner, and to give citizens of Brainerd real service in his line. He has added to the equipment of the studio some of his own apparatus, and will specialize in portrait, commercial photography and amateur kodak finishing.

Zion Evangelical Aid
The ladies aid of the Zion Evangelical Lutheran church, corner of Main and Broadway, will have an ice cream social in the basement of the church on Wednesday evening, July 18th. Ice cream and cake will be served. The public is invited and urged to attend.

MEXICAN CONFERENCE
NOW IN SESSION

(By United Press)
Mexico City, July 16.—The recognition of Mexico conference began today what is believed to be its last week. A definite settlement before the week was over was predicted by American delegates Warren and Payne, who are planning to leave to report to Washington regarding their success.

Recognition of Mexico by the United States—probably within a year.
The conference has been under way nine full weeks, during which time the United States delegates have pointed out to their Mexican conferees the objectionable points, from the American point of view, in the present constitution of Mexico.

BAD WEATHER
DELAYS FLIGHT

(By United Press)
New York, July 16.—Bad weather prevented Lieut. Russell Maughan from testing today the plane in which he will attempt to fly from New York to San Francisco in a single day.

After the unsuccessful attempt of last week to fly from coast to coast between the rising and setting of the sun, Maughan had planned to take the plane for a trial spin today. The weather made the start for the long trip impossible. Officials at Mitchell field feared it would be Wednesday before the weather permits the proposed trip.

KU KLUX KLAN HAVE
SECRET GATHERING

(By United Press)
Asheville, N. C., July 16.—Grand dragons and grand titans of the Ku Klux Klan, representing thirty states, attended the annual secret conference here today.

Dr. H. W. Evans, imperial wizard, and other high officials of the Klan were present at the opening session.

PREMIER REFERS TO

SEVEN INJURED
IN "L" ACCIDENT

(By United Press)
New York, July 16.—Seven persons were injured today when a Ninth Avenue elevated train crashed into a stalled subway on a trestle on Jerome avenue.

Motorman Joseph Higgins of the elevated was hurried to a hospital suffering from serious injuries, while five passengers were also taken to hospitals.

The accident occurred on the trestle where the elevated and subway lines converge.

GIRL IS HURT IN
AUTO ACCIDENT

(By United Press)
St. Cloud, July 16.—Clara Janski, 18, of St. Cloud, is suffering internal injuries and a broken arm as the result of an automobile accident on highway number three today. Miss Janski was forced into the ditch when the driver of another car crowded her off the road. Rose Gnskowsky, a companion of Miss Janski, suffered severe bruises and lacerations. The car overturned.

6 ARMED CONVICTS
STILL AT LARGE

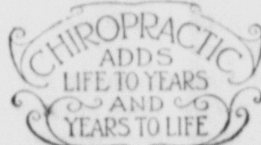

(By United Press)
Philadelphia, July 16.—At large 48 hours after their daring jail break, six armed convicts were hunted by police, sheriffs and troopers of five states today.

The men, who perpetrated a daring escape over the wall of the Eastern Pennsylvania penitentiary Saturday morning, are believed to have scattered after stealing two automobiles and securing clothes for concealing their identities by robbing a farm.

SEVEN INJURED IN "L" ACCIDENT

(By United Press)
New York, July 16.—Seven persons were injured today when a Ninth Avenue elevated train crashed into a stalled subway on a trestle on Jerome avenue.

Motorman Joseph Higgins of the elevated was hurried to a hospital suffering from serious injuries, while five passengers were also taken to hospitals.

The accident occurred on the trestle where the elevated and subway lines converge.

GIRL IS HURT IN AUTO ACCIDENT

(By United Press)
St. Cloud, July 16.—Clara Janski, 18, of St. Cloud, is suffering internal injuries and a broken arm as the result of an automobile accident on highway number three today. Miss Janski was forced into the ditch when the driver of another car crowded her off the road. Rose Gniskowsky, a companion of Miss Janski, suffered severe bruises and lacerations. The car overturned.

6 ARMED CONVICTS STILL AT LARGE

(By United Press)
Philadelphia, July 16.—At large 48 hours after their daring jail break, six armed convicts were hunted by police, sheriffs and troopers of five states today.

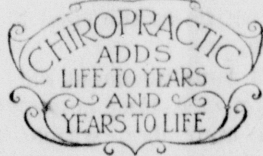

The men, who perpetrated a daring escape over the wall of the Eastern Pennsylvania penitentiary Saturday morning, are believed to have scattered after stealing two automobiles and securing clothes for concealing their identities by robbing a farm.

WHO ARE MY PARENTS?

Notice!

"Who Are My Parents," may safely be recommended to all screen patrons in search of clean, wholesome yet vivid entertainment. The story in itself is so human and appealing that it does not need the name of any well known star to make it a financial success. The cast is a perfectly balanced one and has been so ably directed by J. Searle Dawley that the entire performance of the picture is a source of fine entertainment.

The efforts of the father to prevent his daughter from marrying the man she loves starts a series of emotional complications that are brought up to a powerful climax. Humorous incidents of child life relieve the dramatic tension of the serious scenes.

HIGHEST PRAISE FOR TOURIST CAMP

Mr. and Mrs. Al. G. Marriott of Michigan Lavish in Their Appreciation

HAVE TOURED U. S. 4 YEARS

Brainerd the Only Camp With Free Hot and Cold Water, Shower Baths, and Gas

Nothing but good things to say of the Brainerd tourist camp, is the way in which Mr. and Mrs. Al. G. Marriott, of Gobles, Michigan, characterize their treatment while guests here the past two days.

The Marriotts have been touring the United States for the past four years. They say that the Brainerd camp is the first to have hot and cold water and shower baths, and the only camp with free gas that they know of.

A. G. Keen, caretaker at the local camp, received high praise from Mr. Marriott, for his courteous treatment of visitors, and the efficient manner in which he conducts the camp. Many other places which the Marriotts have visited are remembered by the poor treatment accorded them.

Mr. Marriott conducts a large fruit farm near Gobles. He is traveling in a large Reo truck, with a colored chauffeur.

Other visitors at the camp on Saturday and Sunday include:

Saturday, July 14th
G. A. Loveland and wife, Lincoln, Neb.

Harry Dessen and wife, Leander Thole, Shokopee.

Miss Helen Wellnitz, St. Paul.

PAPER MAKING AND OTHER INDUSTRIES

(Continued from page 1)

no longer be floated down the river. The yard is stocked up to six thousand cords.

The grinding room is equipped with eight grinders and each one is directly connected with a water turbine from which it receives its power. After the logs are ground into pulp a large quantity of water is mixed with the mass which is then pumped to the main mill, located up the hill 71 feet higher than the grinding room.

This pumping system takes the ground and watered pulp to the screening system, where the silvers and knots are eliminated. From the screens, the pulp flows either to the "deckers," which remove some of the water and prepare the pulp for mixing, or else to the "wet" machine where the stock is run over screen cylinders and through presses, to form the "lap" stock, for storage. This lap stock is in the form of sheets approximately a half inch thick. The process of going through the lap machine removes about sixty per cent of the water. Nearly a fourth of the stock made up each day is stored away for winter use, and the rest is sent on to the further processes of manufacturing paper. By means of a pumping system the "deckered" stock is conveyed to what is known as the "beaters." In this operation the pulp is mixed with twelve pounds of alum and twenty-five per cent of sulphite pulp to each batch.

At this stage of the process it may be well to stop and explain the difference between the sulphite pulp and the mechanically formed pulp manufactured at this plant. The mechanical method of forming pulp as described is much cheaper than forming sulphite pulp, which is a chemically formed pulp, because a greater quantity of pulp is obtained from each cord of wood. The strength of the fibres is sacrificed however, because the fibres have been torn apart as they hit the grindstone and average only about one half their natural strength. In the chemical

process after taking off the bark, the wood is cut into small chips about one inch square and one-eighth of an inch in thickness and are then dumped into a digester, in which they are boiled with a chemical solution of acid or alkali, which has the peculiar ability to dissolve the resin and gum in the wood, without affecting the fibre. Inasmuch as a cord of sprucewood will only produce about twelve hundred pounds of fibre by this process, it can be seen that it is more expensive than the mechanical process, particularly when one considers the cost of the chemicals used. The advantage of the chemical pulp, however, is that the fibres come out in their original length and can be used in the manufacture of paper where strength is required.

To resume the processes of making the paper produced by the local mill as was stated above 25 per cent of sulphite pulp together with twelve pounds of alum is mixed with each batch of pulp. The sulphite forms the web of the paper like a screen and the pulp forms the body just as a screen would be filled with plaster. Into the beater is also put coloring to give the paper a white shade instead of the natural wood color. The mixture is beaten for thirty minutes in this machine. In this state it is pumped to a paper machine where it is floated in a great quantity of water on a traveling wire or screen. The wire acts as a sieve the free water in the pulp dropping through the mesh of the screen and the individual fibres remaining on top.

Additional water is extracted by either suction or pressure, so that by the time the fibres have completed their short trip on the traveling wire, they have been matted together with fibres extending in all directions and have formed a sheet of paper. This sheet of paper however, contains approximately 85 per cent of water and in this weakened condition has not the ability to hold together. It is therefore, passed along felts woven from the highest grade of wool, and is carried on these felts through additional press or squeeze rolls, in order to reduce the amount of water contained further. When the condition is reached where it is impracticable to press any considerable quantity of water from the sheet, it is then passed over driers, which are hollow steam heated cylinders four feet in diameter. After passing over these driers the sheet comes out in its completed form, with the exception of the finish or smoothing. Some of the fibres in joining together on the traveling wire are standing up on end which give a very rough appearance to the sheet. It is, therefore, necessary to pass the paper through a set of chilled iron press rolls, which has the same effect as ironing the sheet. At the completion of this ironing, which is called "calendering," the process is complete and the sheet is wound in rolls or cut into sheets to be wrapped up and sent to the consumers or the jobbers. The local company has lately installed a new cutting machine which cuts ten sheets at a time to any desired size. This enables the company to furnish correctly sized paper for use on a flat bed press.

This plant manufactures nothing but news print which has been shown to be formed from twenty-five per cent of chemical pulp and seventy-five per cent of mechanical pulp. The requirements for this grade of paper are cheapness, temporary strength and only thickness sufficient to prevent the print from showing through on the back of the sheet.

The Mill Equipment

The mill was built by the Northwestern Paper company during 1915-16 and the mill started operations on April 17, 1917. The plant is formed of a series of six buildings of very modern construction. The entire plant is protected from the fire dan-

ger by an underground water system. This system is equipped with a 1,000 gallon Fairbanks-Morse fire pump with 140 pounds of steam at the throttle at all times and it can be put into operation by simply opening the throttle. For further protection the company has a 50,000 gallon stand pipe which is connected with a by-pass to the main water line underground and if anything should go wrong with the pump the by-pass is automatically opened and the standpipe furnishes the same pressure as does the pump. It shuts off automatically when the pump is again started. The system has a fire pressure of 60 pounds.

The plant covers 43 acres and one feature that generally surprises visitors is the scrupulous cleanliness of the yards and the neatness with which they are kept. The entire plant is connected with the office by a telephone system.

The water power which operates the machinery of the mill is received from a dam built on the Mississippi river. The dam is 200 feet wide with a twenty foot head and it drives ten turbines. Two of these turbines are used to drive generators and the other eight each run a grinding machine.

The two large generators mentioned above each have a capacity of 700 kw an hour. These generators furnish all the power and lights for the plant with the exception of the big paper machine which is driven by a steam engine. The plant is connected directly with the city of Brainerd and the entire Cuyuna Range and in case of emergency could furnish the range and Little Falls with electricity.

The steam engine which furnishes the power for the paper machine is a Vilter Improved Horizontal Corliss 20x20 Rolling type. It is operated with 140 pounds of steam pressure making 160 revolutions per minute. It is equipped with a Falls Machine company's Automatic Engine Stop. This big machine produces 650 feet of finished paper per minute. Running every twenty-four hours, 865 days in the year, this machine would produce in the course of a year a strip of paper twelve inches wide long enough if laid in a continuous strip to reach from Brainerd to the moon, around the moon, back to Brainerd, and with enough left over to run four times around the world. The boilers which furnish the steam for the engine operating this machine are four in number, each a 250-HP 74"x20" horizontal tubular boiler equipped with Jones stokers.

To facilitate the handling of incoming and outgoing shipments a Browning hoist locomotive crane is used in the yards for the loading and handling of coal and other materials.

The company maintains its own machine shops, fully equipped with the most modern machinery such as drill presses, lathes, etc., and in fact everything that is usually found in an up to date machine shop. Every bit of machine work that is required in the plant is handled by this shop. A fully equipped blacksmith shop and oil house is also maintained.

On an average the company employs about 125 men throughout the year, but during the logging season when a full force is required this number is increased by about fifty.

Approximately 12,500 tons of paper is manufactured and sold each year by this company. For the year 1922 these sales were distributed among the following states: Minnesota, 4,537 tons; Wisconsin, 508 tons; South Dakota, 558 tons; Nebraska, 2,395 tons; Missouri, 331 tons; Illinois, 137 tons; Iowa, 1,879 tons; Texas, 1,769 tons; Arkansas, 597 tons; Colorado, 145 tons; Washington, 57 tons; Ohio, 29 tons; Michigan, 24 tons; and Oklahoma, 47 tons. To give an idea of the extent of the operation of this company and the size of the plant it may be stated that in the course of last year 8,500 tons of coal were burned, 12,550 cords of pulp wood

were ground, 9,600 tons of groundwood pulp used in the manufacture of the paper produced, and a total of 12,000 tons of groundwood pulp made.

Other Industries of Brainerd

One of the most modern sash and door factories in this section of the state is located in Brainerd in the Kampmann and Son plant. This industry was established here under the present management in 1917 when Geo. H. Kampmann and his son took over the plant. It is a complete and modern planing mill in every respect. It has been arranged both for efficient production and the safety and health of its employees. The mill produces such commodities as sash, doors, cabinet work, stair work, interior finishing and general mill work of all kinds, including molding, frames, etc.

One of the growing wholesale businesses of this city is that of the Home Oil company which was organized here in 1922 by the Chicago Home Oil company. It is a home concern in the respect that some \$20,000.00 has been invested in debenture bonds of this concern by local people and it is paying quarterly dividends to these stockholders. An attractive station has been built of Kellastone and brick on the corner of Eighth and Maple streets. The Home Oil company handles the Deep Rock gasoline, oils and greases refined by the Shaffer Refining company of Cushing, Oklahoma. It maintains three trucks to handle the wholesale trade which has been developed in this county.

The Brainerd Bottling Works was established here thirty-nine years ago and is one of the prominent industries of the city. It has been under the present management for the last two years. During this period it has been largely remodeled and made more modern. The Brainerd brand is the trade name of the product of the company which includes all classes of soft drinks. The plant has a capacity for the production of sixty cases of bottled drinks an hour. The company also jobs the near bears, "Budweiser" and "Minnehaha Pale." Five men are employed in the plant and the trade territory of the company extends over a radius of about seventy-five miles.

One of the largest sewing machine agencies north of the Twin Cities is maintained in Brainerd by B. W. Orne. Mr. Orne has the agency for the Singer Sewing Machine for a territory stretching west from Brainerd to Staples, south to Fort Ripley and north to Hackensack. He maintains a sub-agency at Staples. Mr. Orne has been very successful in placing these machines in homes in this territory, having sold some 800 Singers throughout the territory during the last four years.

The Home Bakery is a modern baking plant which in addition to its large retail trade is handling an ever increasing wholesale trade for the territory immediately adjacent to Brainerd. This bakery has built its reputation on quality, the claim that nothing but the purest and richest ingredients ever find their way into its products having been substantiated by its customers.

In addition to the firms mentioned above, Brainerd is also the home of such institutions as the Brainerd Wholesale Grocery company, the Haydon Ice Cream and candy manufacturing company, a wholesale fruit concern and two creameries.

There is little need to go into detail concerning the immense Northern Pacific shops for they are such an integral part of the city that

(Continued on page 4)

The Fourth Essential

After food, clothing and shelter, the most imperative need of civilized society is transportation—quick, dependable, efficient transportation of persons and products.

After the railroad, whose sphere of activities is circumscribed by the location of tracks and terminals, the most important transportation unit is the automobile, truck or other automotive conveyances. These machines know no limitations. They can go wherever the need for transportation exists.

To keep them in action; to make it possible for them to operate under all and every condition, two things are necessary—fuel and lubricating oil.

Sensing this need, the Standard Oil Company (Indiana) long ago began building distribution depots and service stations, at convenient intervals, throughout ten Middle Western states, from which the car owner could secure his requirements of gasoline and lubricants in such quantities as serve him best.

To supply these outlets, enormous investments have been made enlarging the refining facilities of the Company and millions more have been spent getting the refined products to points where effective, economical distribution can be made.

Throughout the ten states where Standard Oil Company (Indiana) service is organized and in operation, the motorist will find a station every few miles in the country; every few blocks in the city.

At these stations he can secure his gasoline and lubricants of highest quality at the lowest market prices and he has at his command free air, free water, rest rooms and comfort stations.

Conveniently located throughout the territory served, these stations are practical symbols of the effort this Company is making to adequately serve a community of thirty million people.

(Continued from page 1)

no longer be floated down the river. The yard is stocked up to six thousand cords.

The grinding room is equipped with eight grinders and each one is directly connected with a water turbine from which it receives its power. After the logs are ground into pulp a large quantity of water is mixed with the mass which is then pumped to the main mill, located up the hill 71 feet higher than the grinding room.

This pumping system takes the ground and watered pulp to the screening system, where the slivers and knots are eliminated. From the screens, the pulp flows either to the "deckers," which remove some of the water and prepare the pulp for mixing, or else to the "wet" machine, where the stock is run over screen cylinders and through presses, to form the "lap" stock, for storage. This lap stock is in the form of sheets approximately a half inch thick. The process of going through the lap machine removes about sixty per cent of the water. Nearly a fourth of the stock made up each day is stored away for winter use, and the rest is sent on to the further processes of manufacturing paper. By means of a pumping system the "deckered" stock is conveyed to what is known as the "beaters." In this operation the pulp is mixed with twelve pounds of alum and twenty-five per cent of sulphite pulp to each batch.

At this stage of the process it may be well to stop and explain the difference between the sulphite pulp and the mechanically formed pulp manufactured at this plant. The mechanical method of forming pulp as described is much cheaper than forming sulphite pulp, which is a chemically formed pulp, because a greater quantity of pulp is obtained from each cord of wood. The strength of the fibres is sacrificed, however, because the fibres have been torn apart as they hit the grindstone and average only about one half their natural strength. In the chemical

process after taking off the bark, the wood is cut into small chips about one inch square and one-eighth of an inch in thickness and are then dumped into a digester, in which they are boiled with a chemical solution of acid or alkali, which has the peculiar ability to dissolve the rosin and gum in the wood, without affecting the fibre. Inasmuch as a cord of sprucewood will only produce about twelve hundred pounds of fibre by this process, it can be seen that it is more expensive than the mechanical process, particularly when one considers the cost of the chemicals used. The advantage of the chemical pulp, however, is that the fibres come out in their original length and can be used in the manufacture of paper where strength is required.

To resume the processes of making the paper produced by the local mill as was stated above 25 per cent of sulphite pulp together with twelve pounds of alum is mixed with each batch of pulp. The sulphite forms the web of the paper like a screen and the pulp forms the body just as a screen would be filled with plaster. Into the beater is also put coloring to give the paper a white shade instead of the natural wood color. The mixture is beaten for thirty minutes in this machine. In this state it is pumped to a paper machine where it is floated in a great quantity of water on a traveling wire or screen. The wire acts as a sieve the free water in the pulp dropping through the mesh of the screen and the individual fibres remaining on top.

Additional water is extracted by either suction or pressure, so that by the time the fibres have completed their short trip on the traveling wire, they have been matted together with fibres extending in all directions and have formed a sheet of paper. This sheet of paper, however, contains approximately 85 per cent of water and in this weakened condition has not the ability to hold together. It is, therefore, passed along felts woven from the highest grade of wool, and is carried on these felts through additional press or squeeze rolls, in order to reduce the amount of water contained further. When the condition is reached where it is impracticable to press any considerable quantity of water from the sheet, it is then passed over driers, which are hollow steam heated cylinders four feet in diameter. After passing over these driers the sheet comes out in its completed form, with the exception of the finish or smoothing. Some of the fibres in joining together on the traveling wire are standing up on end which give a very rough appearance to the sheet. It is, therefore, necessary to pass the paper through a set of chilled iron press rolls, which has the same effect as ironing the sheet. At this completion of this ironing, which is called "calendering," the process is complete and the sheet is wound in rolls or cut into sheets to be wrapped up and sent to the consumers or the jobbers. The local company has lately installed a new cutting machine which cuts ten sheets at a time to any desired size. This enables the company to furnish correctly sized paper for use on a flat bed press.

This plant manufactures nothing but news print which has been shown to be formed from twenty-five per cent of chemical pulp and seventy-five per cent of mechanical pulp. The requirements for this grade of paper are cheapness, temporary strength and only thickness sufficient to prevent the print from showing through on the back of the sheet.

The Mill Equipment

The mill was built by the Northwestern Paper company during 1915-16 and the mill started operations on April 17, 1917. The plant is formed of a series of six buildings of very modern construction. The entire plant is protected from the fire dan-

ger by an underground water system. This system is equipped with a 1,000 gallon Fairbanks-Morse fire pump with 140 pounds of steam at the throttle at all times and it can be put into operation by simply opening the throttle. For further protection the company has a 50,000 gallon stand pipe which is connected with a by-pass to the main water line underground and if anything should go wrong with the pump the by-pass is automatically opened and the standpipe furnishes the same pressure as does the pump. It shuts off automatically when the pump is again started. The system has a pressure of 60 pounds.

The plant covers 43 acres and one feature that generally surprises visitors is the scrupulous cleanliness of the yards and the neatness with which they are kept. The entire plant is connected with the office by a telephone system.

The water power which operates the machinery of the mill is received from a dam built on the Mississippi river. The dam is 200 feet wide with a twenty foot head and it drives ten turbines. Two of these turbines are used to drive generators and the other eight each run a grinding machine.

The two large generators mentioned above each have a capacity of 700 kw an hour. These generators furnish all the power and lights for the plant with the exception of the big paper machine which is driven by a steam engine. The plant is connected directly with the city of Brainerd and the entire Cuyuna Range and in case of emergency could furnish the range and Little Falls with electricity.

The steam engine which furnishes the power for the paper machine is a Vilter Improved Horizontal Corliss 20x30 Rolling type. It is operated with 140 pounds of steam pressure making 160 revolutions per minute. It is equipped with a Falls Machine company's Automatic Engine Stop. This big machine produces 650 feet of finished paper per minute. Running every twenty-four hours, 365 days in the year, this machine would produce in the course of a year a strip of paper twelve inches wide long enough if laid in a continuous strip to reach from Brainerd to the moon, around the moon, back to Brainerd, and with enough left over to run four times around the world. The boilers which furnish the steam for the engine operating this machine are four in number, each a 250-HP 74"x29' horizontal tubular boiler equipped with Jones stokers.

To facilitate the handling of incoming and outgoing shipments a Browning hoist locomotive crane is used in the yards for the loading and handling of coal and other materials. The company maintains its own machine shops, fully equipped with the most modern machinery such as drill presses, lathes, etc., and in fact everything that is usually found in an up to date machine shop. Every bit of machine work that is required in the plant is handled by this shop. A fully equipped blacksmith shop and oil house is also maintained.

On an average the company employs about 125 men throughout the year, but during the logging season when a full force is required this number is increased by about fifty.

Approximately 12,000 tons of paper is manufactured and sold each year by this company. For the year 1922 these sales were distributed among the following states: Minnesota, 4,537 tons; Wisconsin, 508 tons; South Dakota, 558 tons; Nebraska, 2,305 tons; Missouri, 331 tons; Illinois, 137 tons; Iowa, 1,870 tons; Texas, 1,769 tons; Arkansas, 597 tons; Colorado, 145 tons; Washington, 57 tons; Ohio, 29 tons; Michigan, 28 tons; and Oklahoma, 47 tons. To give an idea of the extensiveness of the operation of this company and the size of the plant it may be stated that in the course of last year 8,500 tons of coal were burned, 13,550 cords of pulp wood

were ground, 9,600 tons of ground-wood pulp used in the manufacture of the paper produced, and a total of 12,000 tons of groundwood pulp made.

Other Industries of Brainerd

One of the most modern sash and door factories in this section of the state is located in Brainerd in the Kampman and Son plant. This industry was established here under the present management in 1917 when Geo. H. Kampmann and his son took over the plant. It is a complete and modern planing mill in every respect. It has been arranged both for efficient production and the safety and health of its employees. The mill produces such commodities as sash, doors, cabinet work, stair work, interior finishing and general mill work of all kinds, including molding, frames, etc.

One of the growing wholesale businesses of this city is that of the Home Oil company which was organized here in 1922 by the Chicago Home Oil company. It is a home concern in the respect that some \$20,000.00 has been invested in debenture bonds of this concern by local people and it is paying quarterly dividends to these stockholders. An attractive station has been built of Kellastone and brick on the corner of Eighth and Maple streets. The Home Oil company handles the Deep Rock gasoline, oils and greases refined by the Shafter Refining company of Cushing, Oklahoma. It maintains three trucks to handle the wholesale trade which has been developed in this county.

The Brainerd Bottling Works was established here thirty-nine years ago and is one of the prominent industries of the city. It has been under the present management for the last two years. During this period it has been largely remodeled and made more modern. The Brainerd brand is the trade name of the product of the company which includes all classes of soft drinks. The plant has a capacity for the production of sixty cases of bottled drinks an hour. The company also jobs the near beers, "Budweiser" and "Minnehaha Pale." Five men are employed in the plant and the trade territory of the company extends over a radius of about seventy-five miles.

One of the largest sewing machine agencies north of the Twin Cities is maintained in Brainerd by B. W. Orne. Mr. Orne has the agency for the Singer Sewing Machine for a territory stretching west from Brainerd to Staples, south to Fort Ripley and north to Hackensack. He maintains a sub-agency at Staples. Mr. Orne has been very successful in placing these machines in homes in this territory, having sold some 809 Singers throughout the territory during the last four years.

The Home Bakery is a modern baking plant which in addition to its large retail trade is handling an ever increasing wholesale trade for the territory immediately adjacent to Brainerd. This bakery has built its reputation on quality, the claim that nothing but the purest and richest ingredients ever find their way into its products having been substantiated by its customers.

In addition to the firms mentioned above, Brainerd is also the home of such institutions as the Brainerd Wholesale Grocery company, the Haydon Ice Cream and candy manufacturing company, a wholesale fruit concern and two creameries.

There is little need to go into detail concerning the immense Northern Pacific shops for they are such an integral part of the city that

The Fourth Essential

After food, clothing and shelter, the most imperative need of civilized society is transportation—quick, dependable, efficient transportation of persons and products.

After the railroad, whose sphere of activities is circumscribed by the location of tracks and terminals, the most important transportation unit is the automobile, truck or other automotive conveyances. These machines know no limitations. They can go wherever the need for transportation exists.

To keep them in action; to make it possible for them to operate under all and every condition, two things are necessary—fuel and lubricating oil.

Sensing this need, the Standard Oil Company (Indiana) long ago began building distribution depots and service stations, at convenient intervals, throughout ten Middle Western states, from which the car owner could secure his requirements of gasoline and lubricants in such quantities as serve him best.

To supply these outlets, enormous investments have been made enlarging the refining facilities of the Company and millions more have been spent getting the refined products to points where effective, economical distribution can be made.

Throughout the ten states where Standard Oil Company (Indiana) service is organized and in operation, the motorist will find a station every few miles in the country; every few blocks in the city.

At these stations he can secure his gasoline and lubricants of highest quality at the lowest market prices and he has at his command free air, free water, rest rooms and comfort stations.

Conveniently located throughout the territory served, these stations are practical symbols of the effort this Company is making to adequately serve a community of thirty million people.

IMPRACICAL MEN DO THE WORLD'S WORK

ONE of the really amusing facts in life is the attitude that practical men take to men who are deemed impractical. It is amusing because the practical men are practical because of the impractical dreamers. It isn't many years since Henry Ford was considered an impractical dreamer and he found it hard to induce practical men to invest a few dollars in his engine. Today, this impractical man, who was the cause of the practical man's amusement, is practically a success, and the practical men who laughed at him would like to own a few shares in his "dream" and they have utilized his "dream" so well that the sale of it has made Henry Ford America's richest man.

It is estimated that the inventions of Thomas A. Edison have led to investments in industry amounting to \$15,000,000,000, and these investments are all the result of dreams. Thomas A. Edison's dreaming has done more for America than all of its merely practical men put together, and the practical men are dependent upon this dreamer.

But there is something of self-congratulation in saying that one is practical, and the fact that it is the dreamer who is really practical, because he accomplishes something that the practical man does not, has not yet been sensed by the practical man who is so practical and, therefore, fixed, centered and just normal, that he does nothing except use what the dreamer gives him to utilize. Accordingly we have such practical statements as this which appears in a recent weekly paper: "If 'universal cooperation,' that is political cooperation, is the evolution of human society, then the time will come when all nations will disappear in one great nation. Such political cooperation is impossible. Such a cooperation would result in an 'age of confusion' indeed! Certainly there can be and is universal commercial and economic cooperation consistent with national safety and welfare; but never universal political cooperation. Such an idea is neither rational nor sensible. It illustrates how nebulous and visionary are many of the international dreamers who talk in the clouds about 'moral leadership' and 'rare opportunity'."

This writer must have been studying the arguments of those men who were practical, and believed in state rights, and were opposed to the political cooperation of the states, and criticized the "nebulous" and "visionary" ideas of those dreamers whose ideas are embodied in the United States of America, the wealthiest and most practical nation on the face of the earth because its Edisons and Fords keep on dreaming.

EQUAL RIGHTS IN THE DIVORCE COURT

THE grounds for divorce in Britain remain the same, when the petitioner is a man, but by a new law women have been given an equal status with men in the divorce court. Until this law was passed it was necessary for a wife to show two statutory grounds when applying for a divorce. She was required to show that her husband had been guilty of misconduct and of cruelty, while a husband could secure a divorce by proving his wife's misconduct.

This change, which means equalization of the sexes so far as the law governing divorce is concerned, was not made without opposition from those who believe that conditions call for a greater respect for marriage obligations. But it was because of conditions as they are today that the change was recommended. While it would be well, if it were possible, to have people observe the standards set by others, if these are not taken seriously, and conditions invite a change, refusing to make the change will not in itself improve conditions complained of. In the debate on this measure it was claimed that church congresses had opposed any interference with the divorce laws, but those favoring the change pointed to the obvious fact that many people are not influenced by the recommendations of church congresses. The sanctity of the church are not always sanctities to the people, and when these fail to practice the moral code adopted by the church, the code itself, or the ceremony, does not affect the situation to any great extent.

But on this question there seems to be little ground for argument. If a man may secure a divorce on the ground of misconduct there is no reason why a woman should not win a divorce by proving the same wrong on the part of her husband. Only an ingrained sense of the inferiority of woman would lead to the support of laws that are unequal in their treatment of the sexes. It is not a matter of whether divorce is right or wrong but a question of the equality of the sexes before the court. Equality of the sexes in the divorce court should help to eliminate the double standard which condones the mistakes of a man and condemns a woman for similar transgressions.

GOLF CONQUERS AMERICA

FIGURES that have been compiled show that American manhood has fallen before the temptation of a Scotch game. Golf is the national game in America today and represents an investment of from \$100,000,000 to \$125,000,000 in grounds and clubhouses. There are 2,200 golf links in use in the United States this season and next season will see a large increase in the number of grounds.

Attempts have been made to account for the attraction of the game. When over one million men get out to follow a ball over a course there must be something about the game that has a fascination that is strong enough to overcome the natural desire to avoid exertion. This is proved yet more conclusively by the fact that men who are no longer young are as enthusiastic as youths. The game appeals to all ages, for John D. Rockefeller in his eighties and the caddy in his teens both enjoy this game which has become the favorite pastime of Americans.

Some of the factors that have helped to popularize the game are its health value, its element of chance, its difference from other games in which but a few play while others look on, the fact that a man can play against his own record, against par, against bogey or with other players.

By making all men players, golf is building health, cultivating good sportsmanship and teaching control of temper. It is raising real estate values, stimulating the sale of lands of small value for other purposes, building up a large industry engaged in making the paraphernalia used by golfers and, when taken in moderation, and the ethics of the game demands moderation, it is

helping men in their professions by building up physical strength and mental and nervous control.

BRAINERD'S BATHING BEACH

LUM PARK is attracting the people of Brainerd. Through the activities of the Park board, many improvements have been made this year, and that these are appreciated by the public is disclosed by the increase in those who patronize the beach and enjoy the beauty of the fine park.

Visitors who step on the smooth sand remark that the beach is one of the best to be found anywhere, and the provision of lockers, diving boards and water chute, have made bathing enjoyable. The Park board, by raking the bottom of the lake near the shore line, has endeavored to remove anything that might injure the feet of those who enter the water, but despite the vigilance of the board it has been impossible to keep the lake bottom free from broken glass which endangers those who seek the water.

Two persons out of twelve, who went out as an organization to enjoy an evening at the lake and a lunch at the park, were badly cut this week. It is probable that both of these stepped on the same piece of glass, part of a broken bottle in all probability, for such a fragment was discovered just after by a member of the Park board.

It may be that those who are responsible for throwing broken glass into the lake do not consider just how badly bathers may be cut by stepping on it. It would not seem that anyone would deliberately and maliciously attempt to injure others by throwing broken bottles where barefooted bathers are likely to step. But whether it is done through deliberation, or without consideration of the consequences, the result is the same, and bathers receive frightful gashes that cause much pain and which might result in permanent injury.

This bathing beach belongs to the public and the public should take good care of it. It is impossible for the Park board to guard it at all hours, nor should this be necessary. Individuals, whether they do or do not enjoy bathing, might remember that those who do should not be endangered through the carelessness of those who throw glass into the lake. In the case of those recently injured, one was a visitor who had been invited out by friends and the other a resident of Brainerd.

PEOPLE on Brainerd's streets in the summer season, as they see the tourists drive through, are often inclined to question, "Who's who?"

THOSE who don't enjoy worshipping at the shrine of King Winter read with mingled feelings the announcement that harvesting has begun in the Northwest.

BROOKHART DOES NOT TALK ABOUT RUSSIA

(By United Press)
Boston, Mass., July 16.—Senator Smith Brookhart of Iowa was understood to be visiting "somewhere in New England" today. The senator, who arrived here aboard the President Polk yesterday after a trip to Russia, refused to discuss the Russian situation and apparently was anxious to avoid newspaper men.

BROOKHART IS JOHNSON'S IDEAL OF A STATESMAN

St. Paul, July 16.—Senator Smith Brookhart of Iowa, who has just returned to this country from a tour of Russia, is the "ideal" of Magnus Johnson, Farmer-Labor candidate for the United States Senate in today's election.

"Senator Brookhart is my idea of the greatest statesman in the United States today," said Magnus Johnson. "I feel much the same way about Senator LaFollette of Wisconsin and Senator Shipstead of Minnesota."

Floats Planned at State Elks Convention

Hibbing, Minn., July 16.—Committees of the Elks engaged in preparing for the state convention here in August will urge representatives of lodges from cities to have floats in the parade here.

Oscar Aubin, secretary of the Hibbing lodge, said arrangements have been made whereby Hibbing lumber dealers will furnish material for floats at nominal cost, so that the floats can be built here.

"SHE" BANDIT IS CHARGED WITH MURDER

(By United Press)
Chicago, July 16.—A true bill charging Fred G. Thompson, "girl bandit" impersonator, with the murder of Richard C. Tesmer, insurance adjuster, was returned by the grand jury here today. Tesmer was killed during a holdup at his Gold Coast home.

DECLINES PRESIDENCY OKLAHOMA UNIVERSITY

(By United Press)
Madison, Wis., July 16.—Professor William H. Kieckhefer, head of the economics department of the University of Wisconsin, has declined the presidency of Oklahoma University, offered him by the regents of that institution.

INTERURBAN AND FREIGHT COLLISION

(By United Press)
Elgin, Ill., July 16.—Twelve people were injured, one perhaps fatally when an Elgin and Belvidere interurban and freight collided near here.

PAPER MAKING AND OTHER INDUSTRIES

(Continued From Page 3)

their operation and extent is a matter of common knowledge. The railroad facilities are excellent here, there being ten passenger trains passing through here daily and twenty freight over the Northern Pacific line.

All these trains are local and connect with the through trains at Staples. The freight business handled over this road is quite large and consists chiefly of such commodities as paper, lumber, flour, feed, groceries and general freight.

The shops maintained by the Northern Pacific company are now being operated by a full force, a total of 1,675 men. The passenger and the freight departments of the station here employ seven and twelve men respectively. The station is a new and modern structure, having been erected in 1915, and contains the offices of the freight agent, the passenger agent, the yard master, road master, auditor, shop superintendent and the division stores superintendent.

The Minnesota and International Railway company runs between Brainerd and International Falls, these two points being the terminals. The general offices are contained in the Northern Pacific station, the ticket agency also being located in this building. Two trains are operated both ways daily. Both are local. Eight local freights also pass over this road daily. The road main-

tains a branch line extending from Funkley to Kellier. The commodities handled by the freight service of the line are chiefly forest products, lumber, paper, grain and stock. A total of sixty-five men are employed by this company. The

Northern Pacific shops located here also serve this company.

GRANDMA USED SAGE TEA TO DARKEN HAIR

She Mixed Sulphur With It to Restore Color, Gloss, Youthfulness

Common garden sage brewed into a heavy tea, with sulphur added, will turn gray, streaked and faded hair beautifully dark and luxuriant. Just a few applications will prove a revelation if your hair is fading, streaked or gray. Mixing the Sage Tea and Sulphur recipe at home, though, is troublesome. An easier way is to get a bottle of Wyeth's Sage and Sulphur Compound at any drug store, all ready for use. This is the oldtime recipe improved by the addition of other ingredients.

While wispy, gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness. By darkening your hair with Wyeth's Sage and Sulphur Compound no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared, and after another application or two your hair becomes beautifully dark, glossy, soft and luxuriant.

IMPRACTICAL MEN DO THE WORLD'S WORK

ONE of the really amusing facts in life is the attitude that practical men take to men who are deemed impractical. It is amusing because the practical men are practical because of the impractical dreamers. It isn't many years since Henry Ford was considered an impractical dreamer and he found it hard to induce practical men to invest a few dollars in his engine. Today, this impractical man, who was the cause of the practical man's amusement, is practically a success, and the practical men who laughed at him would like to own a few shares in his "dream" and they have utilized his "dream" so well that the sale of it has made Henry Ford America's richest man.

It is estimated that the inventions of Thomas A. Edison have led to investments in industry amounting to \$15,000,000,000, and these investments are all the result of dreams. Thomas A. Edison's dreaming has done more for America than all of its merely practical men put together, and the practical men are dependent upon this dreamer.

But there is something of self-congratulation in saying that one is practical, and the fact that it is the dreamer who is really practical, because he accomplishes something that the practical man does not, has not yet been sensed by the practical man who is so practical and, therefore, fixed, centered and just normal, that he does nothing except use what the dreamer gives him to utilize. Accordingly we have such practical statements as this which appears in a recent weekly paper: "If 'universal cooperation,' that is political cooperation, is the evolution of human society, then the time will come when all nations will disappear in one great nation. Such political cooperation is impossible. Such a cooperation would result in an 'age of confusion' indeed! Certainly there can be and is universal commercial and economic cooperation consistent with national safety and welfare; but never universal political cooperation. Such an idea is neither rational nor sensible. It illustrates how nebulous and visionary are many of the international dreamers who talk in the clouds about 'moral leadership' and 'rare opportunity'."

This writer must have been studying the arguments of those men who were practical, and believed in state rights, and were opposed to the political cooperation of the states, and criticized the "nebulous" and "visionary" ideas of those dreamers whose ideas are embodied in the United States of America, the wealthiest and most practical nation on the face of the earth because its Edisons and Fords keep on dreaming.

EQUAL RIGHTS IN THE DIVORCE COURT

THE grounds for divorce in Britain remain the same, when the petitioner is a man, but by a new law women have been given an equal status with men in the divorce court. Until this law was passed it was necessary for a wife to show two statutory grounds when applying for a divorce. She was required to show that her husband had been guilty of misconduct and of cruelty, while a husband could secure a divorce by proving his wife's misconduct.

This change, which means equalization of the sexes so far as the law governing divorce is concerned, was not made without opposition from those who believe that conditions call for a greater respect for marriage obligations. But it was because of conditions as they are today that the change was recommended. While it would be well, if it were possible, to have people observe the standards set by others, if these are not taken seriously, and conditions invite a change, refusing to make the change will not in itself improve conditions complained of. In the debate on this measure it was claimed that church congresses had opposed any interference with the divorce laws, but those favoring the change pointed to the obvious fact that many people are not influenced by the recommendations of church congresses. The sanctity of the church are not always sanctities to the people, and when these fail to practice the moral code adopted by the church, the code itself, or the ceremony, does not affect the situation to any great extent.

But on this question there seems to be little ground for argument. If a man may secure a divorce on the ground of misconduct there is no reason why a woman should not win a divorce by proving the same wrong on the part of her husband. Only an ingrained sense of the inferiority of woman would lead to the support of laws that are unequal in their treatment of the sexes. It is not a matter of whether divorce is right or wrong but a question of the equality of the sexes before the court. Equality of the sexes in the divorce court should help to eliminate the double standard which condones the mistakes of a man and condemns a woman for similar transgressions.

GOLF CONQUERS AMERICA

FIGURES that have been compiled show that American manhood has fallen before the temptation of a Scotch game. Golf is the national game in America today and represents an investment of from \$100,000,000 to \$125,000,000 in grounds and clubhouses. There are 2,200 golf links in use in the United States this season and next season will see a large increase in the number of grounds.

Attempts have been made to account for the attraction of the game. When over one million men get out to follow a ball over a course there must be something about the game that has a fascination that is strong enough to overcome the natural desire to avoid exertion. This is proved yet more conclusively by the fact that men who are no longer young are as enthusiastic as youths. The game appeals to all ages, for John D. Rockefeller in his eighties and the caddy in his teens both enjoy this game which has become the favorite pastime of Americans.

Some of the factors that have helped to popularize the game are its health value, its element of chance, its difference from other games in which but a few play while others look on, the fact that a man can play against his own record, against par, against bogey or with other players.

By making all men players, golf is building health, cultivating good sportsmanship and teaching control of temper. It is raising real estate values, stimulating the sale of lands of small value for other purposes, building up a large industry engaged in making the paraphernalia used by golfers and, when taken in moderation, and the ethics of the game demands moderation, it is

helping men in their professions by building up physical strength and mental and nervous control.

BRAINERD'S BATHING BEACH

LUM PARK is attracting the people of Brainerd. Through the activities of the Park board, many improvements have been made this year, and that these are appreciated by the public is disclosed by the increase in those who patronize the beach and enjoy the beauty of the fine park.

Visitors who step on the smooth sand remark that the beach is one of the best to be found anywhere, and the provision of lockers, diving boards and water chute, have made bathing enjoyable.

The Park board, by raking the bottom of the lake near the shore line, has endeavored to remove anything that might injure the feet of those who enter the water, but despite the vigilance of the board it has been impossible to keep the lake bottom free from broken glass which endangers those who seek the water.

Two persons out of twelve, who went out as an organization to enjoy an evening at the lake and a lunch at the park, were badly cut this week. It is probable that both of these stepped on the same piece of glass, part of a broken bottle in all probability, for such a fragment was discovered just after by a member of the Park board.

It may be that those who are responsible for throwing broken glass into the lake do not consider just how badly bathers may be cut by stepping on it. It would not seem that anyone would deliberately and maliciously attempt to injure others by throwing broken bottles where barefooted bathers are likely to step. But whether it is done through deliberation, or without consideration of the consequences, the result is the same, and bathers receive frightful gashes that cause much pain and which might result in permanent injury.

This bathing beach belongs to the public and the public should take good care of it. It is impossible for the Park board to guard it at all hours, nor should this be necessary. Individuals, whether they do or do not enjoy bathing, might remember that those who do should not be endangered through the carelessness of those who throw glass into the lake. In the case of those recently injured, one was a visitor who had been invited out by friends and the other a resident of Brainerd.

PEOPLE on Brainerd's streets in the summer season, as they see the tourists drive through, are often inclined to question, "Who's who?"

THOSE who don't enjoy worshipping at the shrine of King Winter read with mingled feelings the announcement that harvesting has begun in the Northwest.

BROOKHART DOES NOT TALK ABOUT RUSSIA

(By United Press)
Boston, Mass., July 16.—Senator Smith Brookhart of Iowa was understood to be visiting "somewhere in New England" today. The senator, who arrived here aboard the President Polk yesterday after a trip to Russia, refused to discuss the Russian situation and apparently was anxious to avoid newspaper men.

BROOKHART IS JOHNSON'S IDEAL OF A STATESMAN

St. Paul, July 16.—Senator Smith Brookhart of Iowa, who has just returned to this country from a tour of Russia, is the "ideal" of Magnus Johnson, Farmer-Labor candidate for the United States Senate in today's election.

"Senator Brookhart is my idea of the greatest statesman in the United States today," said Magnus Johnson. "I feel much the same way about Senator LaFollette of Wisconsin and Senator Shipstead of Minnesota."

Floats Planned at State Elks Convention

Hibbing, Minn., July 16.—Committees of the Elks engaged in preparing for the state convention here in August will urge representatives of lodges from cities to have floats in the parade here.

Oscar Aubin, secretary of the Hibbing lodge, said arrangements have been made whereby Hibbing lumber dealers will furnish material for floats at nominal cost, so that the floats can be built here.

"SHE" BANDIT IS CHARGED WITH MURDER

(By United Press)
Chicago, July 16.—A true bill charging Fred G. Thompson, "girl bandit" impersonator, with the murder of Richard C. Tesmer, insurance adjuster, was returned by the grand jury here today. Tesmer was killed during a holdup at his Gold Coast home.

DECLINES PRESIDENCY OKLAHOMA UNIVERSITY

(By United Press)
Madison, Wis., July 16.—Professor William H. Kieckhefer, head of the economics department of the University of Wisconsin, has declined the presidency of Oklahoma University, offered him by the regents of that institution.

INTERURBAN AND FREIGHT COLLISION

(By United Press)
Elgin, Ill., July 16.—Twelve people were injured, one perhaps fatally when an Elgin and Belvidere interurban and freight collided near here.

PAPER MAKING AND OTHER INDUSTRIES

(Continued From Page 3)

their operation and extent is a matter of common knowledge. The railroad facilities are excellent here, there being ten passenger trains passing through here daily and twenty freight over the Northern Pacific line.

All these trains are local and connect with the through trains at Staples. The freight business handled over this road is quite large and consists chiefly of such commodities as paper, lumber, flour, feed, groceries and general freight.

The shops maintained by the Northern Pacific company are now being operated by a full force, a total of 1,675 men. The passenger and the freight departments of the station here employ seven and twelve men respectively. The station is a new and modern structure, having been erected in 1915, and contains the offices of the freight agent, the passenger agent, the yard master, road master, auditor, shop superintendent and the division stores superintendent.

The Minnesota and International Railway company runs between Brainerd and International Falls, these two points being the terminals. The general offices are contained in the Northern Pacific station, the ticket agency also being located in this building. Two trains are operated both ways daily. Both are local. Eight local freights also pass over this road daily. The road main-

tains a branch line extending from Funkley to Kelliher. The commodities handled by the freight service of the line are chiefly forest products, lumber, paper, grain and stock. A total of sixty-five men are employed by this company. The

Northern Pacific shops located here also serve this company.

Church Bells of Porcelain.
A cathedral in France is to have a carillon of 60 bells made of porcelain.

"Masterpieces Of Plumbing"

The light of a thousand uses; one use is often worth a thousand times the small price.
Complete with batteries.

\$1.35 to \$4.50

Eveready Unit Cell Batteries fit and improve all flashlights. The proof of proven quality.

RIOT IN STAD OLD ROGERS PARK

(By United Press)
Chicago, July 16.—A riot of 500 persons resulting from a holdup was quelled by police in Rogers Park late Sunday after a half dozen persons had been knocked unconscious. The trouble began when three bandits attempted to force a taxi driver to help them to escape after a holdup. Other taxi drivers overtook the fleeing car, and then the fight between drivers and robbers was joined by Rogers Park citizens. Police riot squads arrested 10 men after dispersing the mob.

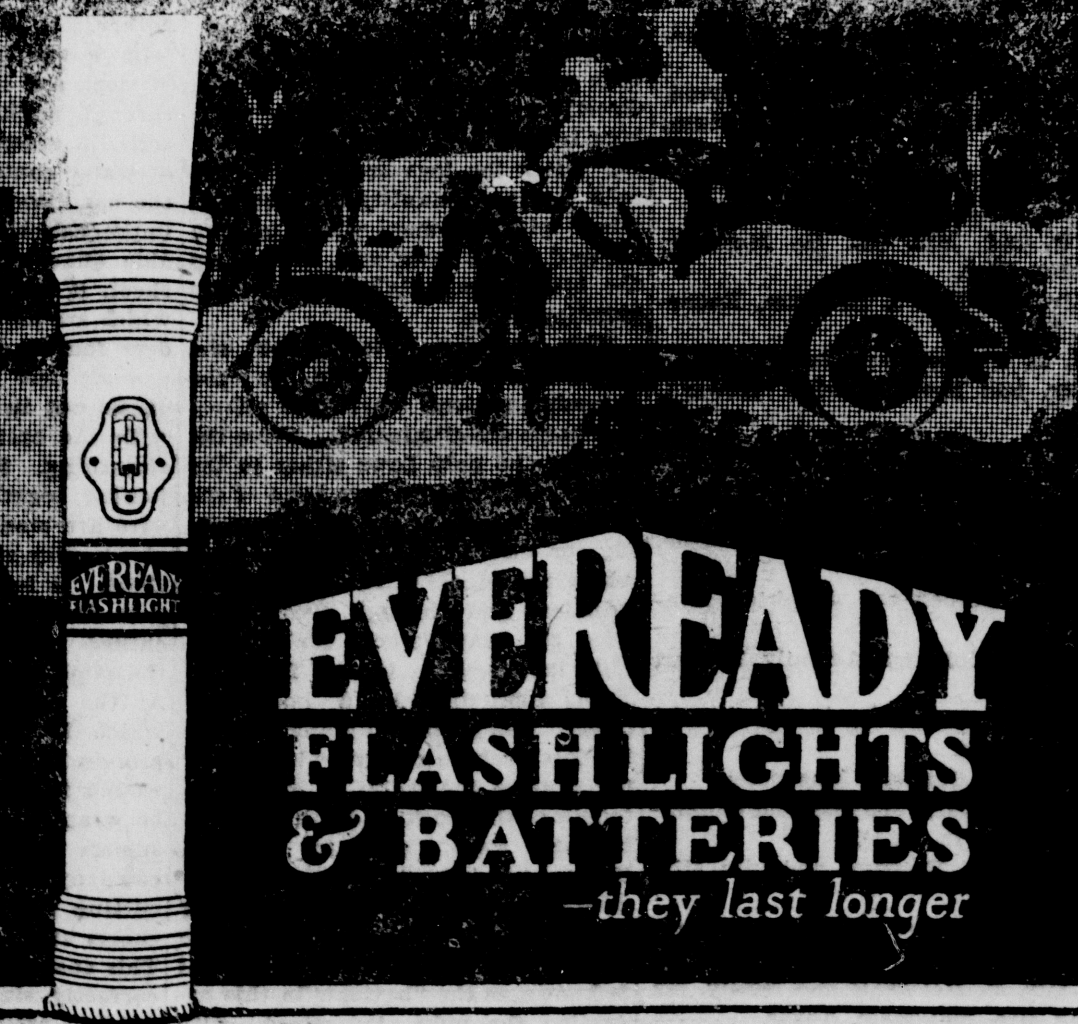

LOST AND FOUND—CALL 74

GRANDMA USED SAGE TEA TO DARKEN HAIR

She Mixed Sulphur With It to Restore Color, Gloss, Youthfulness

Common garden sage brewed into a heavy tea, with sulphur added, will turn gray, streaked and faded hair beautifully dark and luxuriant. Just a few applications will prove a revelation if your hair is fading, streaked or gray. Mixing the Sage Tea and Sulphur recipe at home, though, is troublesome. An easier way is to get a bottle of Wyeth's Sage and Sulphur Compound at any drug store, all ready for use. This is the oldtime recipe improved by the addition of other ingredients.

While wispy, gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness. By darkening your hair with Wyeth's Sage and Sulphur Compound no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared, and after another application or two your hair becomes beautifully dark, glossy, soft and luxuriant.

FIRST NATIONAL BANK

Brainerd, Minn.

C. L. BURNETT, JEWELER

AN agency which receives but little publicity but nevertheless goes quietly and efficiently onward in its work of aiding in the promotion of the public health is the optical shop. The average person who is never bothered by eye trouble never gives his eyes a second thought but let them give him even a little bit of trouble and he realizes the extremely important part they play in his every day life. The eye in spite of its delicate construction is a rather hardy part of the human body and stands much more abuse than it would seem possible when considering its minute parts, but when trouble does develop then is the time for one to go to a specialist.

All too frequently the eye will go on working with perfect satisfaction long after the trouble which is gradually weakening it has started its work and then suddenly it quits on the job. The children of grade schools are now having their eyes tested regularly and it would be a great benefit to public health if grown people were required to do the same. By having eyes tested regularly, developing eye trouble can immediately be detected and means taken to prevent its further development. Frequently glasses can be fitted to the eyes which will not only prevent further development but will also effect a complete cure. Those eyes with incurable defects can be fitted with glasses which will eliminate faulty vision. In olden days people sometimes went through life seeing objects through a haze because of permanent and incurable defects in their eyes. Even today there are people who could see much better than they are now doing if fitted with the proper glasses to correct some minor defect.

Modern science has shown that eye trouble affects the entire system, violent headaches being the most frequent manifestation of such trouble. One's efficiency can be cut down tremendously by this means.

C. L. Burnett, optometrist and jeweler, has been located in Brainerd for nineteen years and during that time he has done much for the health of the city through his trade. He is a graduate optometrist, having been graduated from the Bradley Polytechnic Institute of Peoria, Illinois. He took the St. Paul state board examination in March, 1917, and is a competent practitioner of this profession. At his store Mr. Burnett carries a full line of optical parts and supplies and is equipped to fit the eyes with any class of lens. His equipment for testing the eyes is of the latest type that an ingenious science has invented for this purpose. Many people in this community can attest his efficiency along these lines.

In connection with his optical service station he maintains a fully stocked jewelry store. Complete selections may be obtained in such lines as rings, fine glassware, clocks, silverware and precious stones. This is as complete a stock as can be found in the jewelry stores of many a larger city and Mr. Burnett through his long experience in the jewelry trade has selected a line which he can offer to customers with the assurance that they are of the best. In this stock can be found an unusually fine selection of watches. Indicative of the esteem in which Mr. Burnett's specialized knowledge of watches is held is the fact that he is the official Northern Pacific railroad watch inspector.

The shop is completely equipped to handle any kind of watch or jewelry repair work and Mr. Burnett has established a reputation for himself in Brainerd for this type of work. Jobs are promptly and skillfully done and the customer is seldom troubled with bothersome delays.

Mr. Burnett's Optical Service Station and jewelry store is one of the long established business institutions of Brainerd and has created a high and honorable place for itself in the commercial life of the city.

WOODHEAD MOTOR COMPANY

By R. KENNETH EVANS

THE Woodhead Motor Company was organized January 18, 1916, and the corporation is one of the best known in Brainerd and vicinity, handling Ford automobiles, Lincoln motor cars, Fordson farm tractors, John Deere and Oliver plows and implements.

John F. Woodhead is president, general manager and the guiding spirit of the concern and under his direction a record has been made in selling and service. For instance, this year, from January 1st to date, the new Ford sales averaged practically two cars every working day. The slogan has been "You Can Live Without a Ford, But Not So Well." Over one-half the cars in Crow Wing county are Fords, said Mr. Woodhead.

The company is located in a building 100 by 150 feet in size, including the new show room. The latter measures 40 by 80 feet with a ceiling 16 feet high. There is ample space to display the entire line carried. The office equipment is up to date and designed to transact business expeditiously.

A full line of parts is carried, all cataloged and binned. The company has a payroll of \$20,000 a year and employs 14 or more people.

Elmer Widmark is in charge of the parts room. R. E. Warrick is the head of the service and mechanical department. The sales force includes G. W. Smith, Ralph Hodgson, Andy Peterson, of Brainerd; A. D. La Victoire, of Crosby; J. E. Blum, of Ironton; Oscar Swanson, of Pillager.

New cars are kept in stock in all parts of the county, Brainerd acting as the distributing point. Deere and Oliver plows and other implements are distributed in all territory including Brainerd and the state northward.

It is interesting to go over the business files and see the growth attained. Carl F. Peterson, east of the city, bought the first Ford sold by the company. Since thence the sales have topped the 3,000 mark.

The company lays special stress on its service. The mechanical department is in charge of a man who took a special course of instruction at the Ford school in Detroit. His assistants are all men who have had experience at the Minneapolis Ford branch. Tools are of modern design, machinery the best that can be installed. The company has a record of overhauling a Ford complete, from radiator to rear axle, in nine hours. At the service station one gains not alone car service, air, water, gasoline, etc., but real courtesy and genuine attention.

So intense has been the interest of Mr. Woodhead in the Fords that he handles, that he invented a so-called Woodhead Twin Twister. The latter offers a most convenient carburetor control and is now known throughout the civilized world. For instance, besides selling all Ford agencies in the United States, the Woodhead company has received orders from Frazar & Co., of Tokio, Japan; a recent order for 500 from F. Bulow & Co., jobber for Norway, Denmark and Sweden. The product bears the name "Brainerd" on the button and so serves to advertise this town all over the world. Page advertisements are run in the "Ford Dealers' News" of New York and half-page ads in the "Ford Owners' Magazine," of Milwaukee, Wis. It only takes five minutes to install the Woodhead Twin Twister and it does everything claimed for it by its inventor, Mr. Woodhead.

Fordson sales are increasing. No detailed record has been kept of their performance, but the recent work of one which disced 70 acres of ground for 9c per acre, shows what can be done when the tractor is used by a farmer.

Some years ago the company staged an immense tractor and implement exhibition on the grounds on East Oak street. Its only competitor in this line was a similar show staged at Fargo, N. D. It attracted many farmers to Brainerd who were given a demonstration of what Fordson tractor and the various farm implements can do when used in conjunction with a Fordson. This exhibition will be repeated this fall.

The Woodhead Motor company has been most public spirited. It lent its whole hearted support to the furtherance of the great game and fish convention held at Rocky Point resort. It has assisted in innumerable other public matters. One of the latest is the carrying of the Northern Minnesota Editorial association convention to convene in Brainerd July 25 to 29 when a Ford club, to be organized by Mr. Woodhead, will attend to much of the "short haul" transportation of the editors throughout Brainerd and vicinity.

In selling campaigns and merchandising, it is not alone the goods that make an appeal to the purchaser, but coupled with it goes the personality of the dealer, and in this regard one can truthfully say the personality which just bubbles from the Woodhead Motor company and its staff of employees is the kind that wins a customer and endeavors to hold him ever after.

WOODHEAD MOTOR COMPANY

By R. KENNETH EVANS

THE Woodhead Motor Company was organized January 18, 1916, and the corporation is one of the best known in Brainerd and vicinity, handling Ford automobiles, Lincoln motor cars, Fordson farm tractors, John Deere and Oliver plows and implements.

John F. Woodhead is president, general manager and the guiding spirit of the concern and under his direction a record has been made in selling and service. For instance, this year, from January 1st to date, the new Ford sales averaged practically two cars every working day. The slogan has been "You Can Live Without a Ford, But Not So Well." Over one-half the cars in Crow Wing county are Fords, said Mr. Woodhead.

The company is located in a building 160 by 150 feet in size, including the new show room. The latter measures 40 by 80 feet with a ceiling 16 feet high. There is ample space to display the entire line carried. The office equipment is up to date and designed to transact business expeditiously.

A full line of parts is carried, all cataloged and binned. The company has a payroll of \$20,000 a year and employs 14 or more people.

Elmer Widmark is in charge of the parts room. R. E. Warrick is the head of the service and mechanical department. The sales force includes G. W. Smith, Ralph Hodgson, Andy Peterson, of Brainerd; A. D. La Victoire, of Crosby; J. E. Blum, of Ironton; Oscar Swanson, of Pillager.

New cars are kept in stock in all parts of the county, Brainerd acting as the distributing point. Deere and Oliver plows and other implements are distributed in all territory including Brainerd and the state northward.

It is interesting to go over the business files and see the growth attained. Carl F. Peterson, east of the city, bought the first Ford sold by the company. Since thence the sales have topped the 3,000 mark.

The company lays special stress on its service. The mechanical department is in charge of a man who took a special course of instruction at the Ford school in Detroit. His assistants are all men who have had experience at the Minneapolis Ford branch. Tools are of modern design, machinery the best that can be installed. The company has a record of overhauling a Ford complete, from radiator to rear axle, in nine hours. At the service station one gains not alone car service, air, water, gasoline, etc., but real courtesy and genuine attention.

So intense has been the interest of Mr. Woodhead in the Fords that he handles, that he invented a so-called Woodhead Twin Twister. The latter offers a most convenient carburetor control and is now known throughout the civilized world. For instance, besides selling all Ford agencies in the United States, the Woodhead company has received orders from Frazar & Co., of Tokio, Japan; a recent order for 500 from F. Bulow & Co., jobber for Norway, Denmark and Sweden. The product bears the name "Brainerd" on the button and so serves to advertise this town all over the world. Page advertisements are run in the "Ford Dealers' News" of New York and half-page ads in the "Ford Owners' Magazine," of Milwaukee, Wis. It only takes five minutes to install the Woodhead Twin Twister and it does everything claimed for it by its inventor, Mr. Woodhead.

Fordson sales are increasing. No detailed record has been kept of their performance, but the recent work of one which disced 70 acres of ground for 9c per acre, shows what can be done when the tractor is used by a farmer.

Some years ago the company staged an immense tractor and implement exhibition on the grounds on East Oak street. Its only competitor in this line was a similar show staged at Fargo, N. D. It attracted many farmers to Brainerd who were given a demonstration of what Fordson tractor and the various farm implements can do when used in conjunction with a Fordson. This exhibition will be repeated this fall.

The Woodhead Motor company has been most public spirited. It lent its whole hearted support to the furtherance of the great game and fish convention held at Rocky Point resort. It has assisted in innumerable other public matters. One of the latest is the carrying of the Northern Minnesota Editorial association convention to convene in Brainerd July 25 to 29 when a Ford club, to be organized by Mr. Woodhead, will attend to much of the "short haul" transportation of the editors throughout Brainerd and vicinity.

In selling campaigns and merchandising, it is not alone the goods that make an appeal to the purchaser, but coupled with it goes the personality of the dealer, and in this regard one can truthfully say the personality which just bubbles from the Woodhead Motor company and its staff of employees is the kind that wins a customer and endeavors to hold him ever after.

JUVENILE COURT CASE COMMENTS

Public in General Has No Idea of the
aVst Delinquency Exsiting in
Community

CAUSE OF SERIOUS THOUGHT

Girls Appearing in Certain Cases
Were Without any True Friends
Evidence Submitted Inconsistent

COMMENDS ARTICLE

I have taken considerable
pleasure in going over your en-
closed paper and it certainly
meets with my approval.

If the parents of the many
wayward children that we have
in Brainerd today will only read
and heed this writing, it will
undoubtedly be the means of
causing a more serious thought
for the future welfare of their
children.

The public in general have no
idea of the vast amount of de-
linquency that exists in our
community and the great question
is, what can we do to better the
present condition?

I am very glad that you are
interested in these matters and
you may rest assured that I shall
be pleased to read any writings
of a like nature.

Yours very respectfully,
J. T. SANBORN

The evidence introduced in a hear-
ing in the Juvenile court recently
showed a condition of affairs in
Brainerd and vicinity which, if made
public, would perhaps cause parents
to give more attention to those
earlier mis-steps of their children
that begin the drift which leads to
an appearance in the Juvenile court.

A recent visit to this court, at a
time when two girls were before the
judge as juvenile delinquents, proved
that the officers are most kindly
and courteous in their dealings with
those who have done wrong. There
was a marked absence of the spirit
that would show lack of appreciation
of the many factors that are respon-
sible for such wrong doing. Questions
were asked in a manner that did not
suggest that those in the court room
were intent upon proving to the ac-
cused that they were wholly respon-
sible for their mistakes.

Representatives of the Child Wel-
fare Board of the county were pre-
sent, and information in their pos-
session assured them that these two
girls were not the only ones in the
city who have been delinquent, for
gathered facts prove that the con-
ditions in this city are such that girls
are endangered by the influences they
are brought to bear upon them. With
due knowledge of the prevalence of
these influences, the representatives
of the Child Welfare Board were not
inclined to take the attitude that the
whole weight of responsibility rested
upon those who were present in court
under the charge of delinquency.

But the thing that impressed those
who were present at the hearing
more than anything else was the fact
that the girls were without true
friends. Young men who had ac-
companied them on their excursions
and had taken them to dances in dif-
ferent parts of the county were in-
tent upon shielding themselves from
any blame for the unfortunate situa-
tion in which the girls found them-
selves. The evidence submitted was
strangely inconsistent, and when one
witness affirmed that another had
been one of the company attending a
dance, the one who had been iden-
tified as having been present denied
that he was there, when he took the
stand. Information requested by the
County attorney was not always
forthcoming and the witnesses showed
a careful consideration of the evi-
dence submitted so that they might
be in no way involved as contributors
to the delinquency of those before
the court. If girls, who are inclined
to think that the fellows with whom
they associate on questionable out-
ings are real friends, had the oppor-
tunity of seeing just how much they
may expect from them when the time
comes that they need friends, they
would be more careful in selecting
their companions.

The evidence itself disclosed the
fact that girls are quite ready to ac-
cept the company of men whom they
don't know and to ride in cars whose
owners they know nothing about. It
also proved that the unfortunate
situation in which these girls were
found was the result of a drift,
gradual but certain, a drift that in
the end brought them into court
under the charge of delinquency. It
showed further that parents may ex-
pect that their children are doing

certain desirable things and going to
certain legitimate places when they
are by deception excusing themselves
by naming these places and as-
sociates. Knowledge of the real
facts may come too late and at a time
when habits have been formed that
are not easily broken and which in
the end lead to delinquency.

Those in the court room were fully
conscious of the fact that there are
those who contribute to juvenile de-
linquency and that the girls who find
their way into juvenile court may be
victims of the depravity of associates
who are liable to find themselves
charged with contributing to juvenile
delinquency.

When the evidence led to the
decision that those under indictment
must go to the state home for girls
at Sauk Center, the presiding judge
in committing them to this institu-
tion made an appeal to them to learn
well the lessons that their ex-
perience might teach and determine
to correct their wrongs.

If the public were advised of the
growth in juvenile delinquency in
Brainerd and vicinity, parents and
others would make a more serious
effort to protect their children from
the dangers that confront them and
in going to it that those who are con-
tributing to juvenile delinquency are
punished.

2 AUTOMOBILE ACCIDENTS OCCUR

B. S. Kerbin and Family of St. Cloud
Blinded by Headlights Break
Through Guard Rail

KERBIN HAS SPRAINED WRIST

Ford of Mrs. Glendenning Breaks
Steering Gear, Tips and Loses
2 Wheels

Two automobile accidents were re-
ported over the week end, and by a
queer coincidence, both happened on
the Merrifield road.

The first one occurred about nine
o'clock Saturday evening, when B. S.
Kerbin and family of St. Cloud were
returning from a blueberry picking
excursion to the northern part of the
county. They were blinded by the
lights of an approaching automobile
about a mile north of the paper mill,
and breaking through the guard rail
at the side of the road, their car, a
Buick Six, plunged down about thirty
feet into a ravine.

The occupants escaped injury
miraculously, the only one hurt being
Mr. Kerbin, who suffered a sprained
wrist. The automobile came through
with only a broken top and wind-
shield, regardless of the fact that it
broke down several trees in taking
the dive.

A party consisting of Mrs. Glen-
denning and daughter Irene of Has-
tings, Miss Pearl Shaw, Frances Eck-
hart and Overt Carlson of St. Paul,
were returning Monday morning
from Pelican lake, where they had
been enjoying an outing at one of the
lake cottages, when about three miles
north of Merrifield something went
wrong with the steering gear of the
Ford they were driving, and the car
tipped over, breaking two wheels, the
windshield and top.

Mrs. Glendenning's arm was
bruised on account of being pinned
under the wheel. All others escaped
without injury. Joe Midgley brought
the party to town, and the car is be-
ing repaired at a local garage. The
chief regret was expressed by Mrs.
Glendenning, who had hoped to be
in Hastings today in time to cast her
ballot in the senatorial election.

BUXTON, N. D. HIGH SCHOOL BAND

One of Most Remarkable Organi-
zations of Its Kind to Play in
Brainerd

PLAY CONCERT HERE JULY 26

Band Known Throughout North
Dakota and Gaining National
Reputation

The Buxton, N. D., high school
band, perhaps one of the most re-
markable organizations of its kind
ever assembled, developed in a little
village of 500 population, four times
the winner in the North Dakota an-
nual state high school music contests
will appear in a concert in Gregory
park the evening of Thursday July
26th, under the auspices of the Lions
club of Brainerd. The first number
will be played commencing at 8
o'clock sharp.

This high school band has not only
gained a state-wide reputation since
its inception in the fall of 1919 but
is rapidly becoming known nation-
ally. The membership has been
held at approximately fifty each year,
one half of whom are girls. The
average age of these boys and girls
is 16.5 years.

Last year the band played a long
engagement in the various Minne-
apolis city parks being under con-
tract with the Minneapolis park
board and they return to that city
this year for a similar engagement.
Every community visited last season
has invited the organization back
this year without exception which
goes to prove their ability and popu-
larity.

The band travels in six specially
made Ford trucks and the members
all camp in large tents. The girls
change about preparing the meals
which are served in military style.

The Buxton high school band
plays only the best music—music
that will bring to your soul in-
spiration that you will always re-
member. Their complete repertoire
for the 1923 annual concert season
will be published later.

The Lions club will make a special
effort to arrange for additional num-
bers in honor of the Northern Min-
nesota Editorial convention, which is
in session at the same time. Much
excellent publicity can be gained for
the band in this way, through enter-
taining the editors from over the
state.

IN MUNICIPAL COURT

2 Cases Speeding, 2 of Maintaining
Nuisance, 1 Breaking Game
Laws

The grist of week end arrests,
ground out in municipal court Mon-
day morning included two cases of
speeding, two of maintaining a
nuisance, and one for breaking fish
and game laws.

Thomas and David Barry, of the
East hotel, charged with maintaining
a nuisance were arraigned and their
case set for Monday, July 23rd. Each
gave cash bail of \$150 for their ap-
pearance.

Merrill Congdon, charged with
speeding, was arraigned, and because
of his age, 17 years, was transferred
to the juvenile court, where his case
will be heard on August 7th.

Emory Diken, also charged with
speeding, plead guilty and paid a
fine of \$10.

Chris Schultz, caretaker at Grand
View lodge, plead guilty to having a
gill net on the shores of Gull lake
and was fined \$50. He paid \$25 and
was given a stay of 30 days on the
balance. This is his second offense.
It is said, "The arrest was made by
Deputy Game Warden A. P. Cardie."

Lasher-Crowell

On Saturday afternoon July 14th
at the parsonage of the Norwegian
Danish Lutheran church occurred
the marriage of Miss Irene Crowell
to Victor Lasher, Rev. O. L. Bolstad
officiating using the ring service.
Mr. and Mrs. Charles Isle of Bay
Lake township acted as witnesses to
the ceremony. The groom is a son
of Mrs. Mary Lasher, 509 Oak St.
N. E. Brainerd, and the bride is a
daughter of Mr. and Mrs. Mel Crow-
well of Dykeman.

The newlyweds will make their
home in N. E. Brainerd, where Mr.
Lasher is employed in the N. P.
shop. Their many friends unite in
wishing them prosperity and hap-
piness in their married life.

Alpha Class

The Alpha class of the First Baptist
church will be entertained this even-
ing at the home of Mrs. George A.

Nuisance, 1 Breaking Game
Laws

The grist of week end arrests,
ground out in municipal court Mon-
day morning included two cases of
speeding, two of maintaining a
nuisance, and one for breaking fish
and game laws.

Thomas and David Barry, of the
East hotel, charged with maintaining
a nuisance were arraigned and their
case set for Monday, July 23rd. Each
gave cash bail of \$150 for their ap-
pearance.

Merrill Congdon, charged with
speeding, was arraigned, and because
of his age, 17 years, was transferred
to the juvenile court, where his case
will be heard on August 7th.

Emory Diken, also charged with
speeding, plead guilty and paid a
fine of \$10.

Chris Schultz, caretaker at Grand
View lodge, plead guilty to having a
gill net on the shores of Gull lake
and was fined \$50. He paid \$25 and
was given a stay of 30 days on the
balance. This is his second offense.

It is said, "The arrest was made by
Deputy Game Warden A. P. Cardie."

Lasher-Crowell

On Saturday afternoon July 14th
at the parsonage of the Norwegian
Danish Lutheran church occurred
the marriage of Miss Irene Crowell
to Victor Lasher, Rev. O. L. Bolstad
officiating using the ring service.
Mr. and Mrs. Charles Isle of Bay
Lake township acted as witnesses to
the ceremony. The groom is a son
of Mrs. Mary Lasher, 509 Oak St.
N. E. Brainerd, and the bride is a
daughter of Mr. and Mrs. Mel Crow-
well of Dykeman.

The newlyweds will make their
home in N. E. Brainerd, where Mr.
Lasher is employed in the N. P.
shop. Their many friends unite in
wishing them prosperity and hap-
piness in their married life.

Alpha Class

The Alpha class of the First Baptist
church will be entertained this even-
ing at the home of Mrs. George A.

SPORTS

BIG MONEY IN JOB AS HEAVYWEIGHT CHAMP

By PAUL R. MALLON

United Press Staff Correspondent

New York, July 16.—Jack Dempsey has made an even million dollars out of four afternoons' work as heavyweight champion of the world.

Figured down in minutes, it is estimated that the Iron Man worked about two hours for his cool million. Of course, he had to spend a lot of time in training, but there probably isn't any worker in the United States or any sport champion who received anything near the sum he has cashed in.

Dempsey got one hundred thousand iron men for bowling over Billy Miske and a hundred thousand more for playing around a few rounds with Bill Brennan.

Then came Georges Carpentier, the French beau brummel, who wanted to get knocked out. Dempsey did it for 90,000 spectators for \$300,000.

Then there was the Shelby affair with Tommy Gibbons. Jack Kearns, manager of the champ, after fidgeting with the promoters for a while, whistled to himself, "My Gawd, how the money rolls in!" and plucked out \$300,000. Those four fights gave Dempsey \$800,000. Movie rights and other concessions bring the total to an even million. A few exhibitions may have been necessary to swell the figure, but Jack Kearns attended to those.

Dempsey and Kearns were just about broke when the fight with Jess Willard was arranged at Toledo four years ago.

It was a tough break of luck that kept Zev, the champion three-year-old, out of the Latonia Derby. That race was just what Zev needed to set a new record for cash earned during the season. It also would have made more certain the position he holds as king of his class.

The west cleaned up in the race, winning the first three positions at the finish. Without attempting to detract from his honor, it is only fair to say that it probably would have been a different story if Zev had run.

GOVERNMENT HAS LIEN ON ALL PROPERTY OF SHELBY'S JIM JOHNSON

Shelby, Mont., July 16.—The Dempsey-Gibbons fight brought more grief to Shelby today.

A tax lien for \$5,812.85, the balance of the amusement tax due the government, has been filed against all property of Jim Johnson, mayor, by C. A. Rasmussen, collector of internal revenue for Montana.

CHARLIE WHITE TO BOX RICHIE MITCHELL

New York, July 16.—Charlie White, the hard swiping left handed boxer from Chicago, and Ritchie Mitchell, the game fellow from Milwaukee, are going to have it out all over again. On Wednesday night at the Bronx Velodrome Charlie and the Mitchell boys are going to step for 15 rounds or less, with the promise that the winner will get a paste at Benny Leonard for the championship.

Nearly a year ago, White and Mitchell had a terrific engagement in Madison Square Garden. White, H. Wathen, Louisville distiller and came through and knocked Ritchie baseball magnate.

ST. PAUL JOCKEY RIDES FOUR WINNERS IN FARGO RACE MEET

Fargo, N. D., July 16.—Tommy O'Hara, St. Paul jockey, piloted winners in four events of the Derby day program at the Interstate fair here today. There were five events and O'Hara did not compete in the final event, a seven furlong dash.

O'Hara won the first event, the five furlong dash, with Maizie Barber, a chestnut mare owned by Mrs. J. Gleason of St. Paul. Maizie's time for the distance was 1:03.

O'Hara rode Quantrell to victory in the six furlong, Rockwood in the mile, the feature event of the day, and Ruby Orile in the 4½ furlong dash.

The seven furlong race was won by Potters first, Barton up, in 1:30.

Is Daddy of Harness Drivers

Edward ("Pop") Geers in his 73d year is the daddy and dean of all light harness drivers. During his career he has had both ankles, both legs, one thigh, both arms and several ribs broken in accidents.

BUENOS AIRES WILD OVER LUIS FIRPO WIN

Buenos Aires, July 14.—Tumultuous enthusiasm, the like of which Buenos Aires seldom has seen before, followed the receipt of the news of

"WHO ARE MY PARENTS?" WILLIAM FOX SPECIAL PRODUCTION

Critic Lauds Wm. Fox "Who Are My Parents?"

A well known New York critic commenting on the William Fox special, "Who Are My Parents?", now showing at the Lyceum theatre, characterized the picture as one of the finest and most timely films of the day.

"It appeals to everyone," he said. "It appeals to children because there are a lot of children in the play, and their frolics naturally amuse those of their tender age. It appeals to

Luis Angel Firpo's victory over Jess Willard. Great crowds marched through the streets, shouting and singing and making impromptu torches out of twisted newspapers.

The result was announced here one minute after the referee counted out Willard in the ring at Boyle's Thirty Acres at Jersey City.

Crowds of boxing fans gathered before the newspaper bulletin boards early in the evening. The police were forced to their greatest efforts to maintain order.

The first great demonstration occurred when it was announced that the ringside betting was 2 to 1 in favor of the Argentinean. The crowd roared "Viva Firpo!" and sang loudly.

CANADA HAS A BUMPER WHEAT CROP

(By United Press)

Montreal, Quebec, July 14.—The largest wheat crop in Canadian history is being predicted. Estimates now run as high as 500,000,000 bushels.

The Dominion Bureau of Statistics is one of the agencies predicting a bumper crop. The total wheat area is 22,169,300 acres, a decrease of 253,295 from last year, but the condition is 106 per cent compared with 95 per cent last year.

There is abundance of moisture and satisfactory growth. The most valuable crop to date was that of 1915 with 396,000,000 bushels, while last year's crop of 364,000,000 bushels was the largest previous figure.

In anticipation of a bumper crop, the Canadian Pacific railroad is adding 60 new engines to its present equipment, as well as 2,000 box cars.

May Build High Arena

New York, July 16.—Tex Rickard plans a big sports arena in New York, where summer and winter pastimes can be held. Similar structures are reported planned for St. Louis, Kansas City, Omaha, Cincinnati, Philadelphia and Pittsburgh.

BIG MONEY IN JOB AS HEAVYWEIGHT CHAMP

By PAUL R. MALLON
United Press Staff Correspondent

New York, July 16.—Jack Dempsey has made an even million dollars out of four afternoons' work as heavyweight champion of the world.

Figured down in minutes, it is estimated that the Iron Man worked about two hours for his cool million. Of course, he had to spend a lot of time in training, but there probably isn't any worker in the United States or any sport champion who received anything near the sum he has cashed in.

Dempsey got one hundred thousand iron men for bowling over Billy Miske and a hundred thousand more for playing around a few rounds with Bill Brennan.

Then came Georges Carpentier, the French bean brummel, who wanted to get knocked out. Dempsey did it for 90,000 spectators for \$300,000.

Then there was the Shelby affair with Tommy Gibbons. Jack Kearns, manager of the champ, after fidgeting with the promoters for a while, whistled to himself, "My Gawd, how the money rolls in!" and plucked out \$300,000.

Those four fights gave Dempsey \$800,000. Movie rights and other concessions bring the total to an even million. A few exhibitions may have been necessary to swell the figure, but Jack Kearns attended to those.

Dempsey and Kearns were just about broke when the fight with Jess Willard was arranged at Toledo four years ago.

It was a tough break of luck that kept Zev, the champion three-year-old, out of the Latonia Derby. That race was just what Zev needed to set a new record for cash earned during the season. It also would have made more certain the position he holds as king of his class.

The west cleaned up in the race, winning the first three positions at the finish. Without attempting to detract from his honor, it is only fair to say that it probably would have been a different story if Zev had run.

GOVERNMENT HAS LIEN ON ALL PROPERTY OF SHELBY'S JIM JOHNSON

Shelby, Mont., July 16.—The Dempsey-Gibbons fight brought more grief to Shelby today.

A tax lien for \$5,812.85, the balance of the amusement tax due the government, has been filed against all property of Jim Johnson, mayor, by C. A. Rasmussen, collector of internal revenue for Montana.

CHARLIE WHITE TO BOX RICHIE MITCHELL

New York, July 16.—Charles White, the hard swinging left handed boxer from Chicago, and Ritchie Mitchell, the game fellow from Milwaukee, are going to have it out all over again. On Wednesday night at the Bronx Velodrome Charles and the Mitchell boys are going to step for 15 rounds or less, with the promise that the winner will get a pasta at Benny Leonard for the championship.

Nearly a year ago, White and Mitchell had a terrific engagement in Madison Square Garden. White, H. Wathen, Louisville distiller and came through and knocked Ritchie

cold about the 12th round. This time Mitchell says that he is all set to take the windy city scrapper.

The next big quarrel around these parts, following the White-Mitchell affair, is the 15 round battle between Benny Leonard and Lew Tendler, the Quaker southpaw, which is scheduled to take place at the Yankee stadium on July 23. That scrap might make a new champion in the lightweight division if they should agree to fight at the lightweight limit, but chances are that Lew and Benny are going to ease in at catch weights without any title at stake.

CHARGE CONSPIRACY TRANSPORTING LIQUOR

Chicago, July 16.—Federal indictments charging conspiracy to transport liquor against 22 Chicago, New York and Louisville men were made public here today.

The defendants are charged with plotting to bring 1,000 cases of whiskey here from Louisville. They include John J. McLaughlin, former Illinois legislator; William A. Sadler, New York stock broker, and O. in Madison Square Garden. White, H. Wathen, Louisville distiller and came through and knocked Ritchie

ST. PAUL JOCKEY RIDES FOUR WINNERS IN FARGO RACE MEET

Fargo, N. D., July 16.—Tommy O'Hara, St. Paul jockey, piloted winners in four events of the Derby day program at the Interstate fair here today. There were five events and O'Hara did not compete in the final event, a seven furlong dash.

O'Hara won the first event, the five furlong dash, with Maizie Barber, a chestnut mare owned by Mrs. J. Gleason of St. Paul. Maizie's time for the distance was 1:03.

O'Hara rode Quentrell to victory in the six furlong, Rockwood in the mile, the feature event of the day, and Ruby Orile in the 4 1/2 furlong dash.

The seven furlong race was won by Potters first, Barton up, in 1:39.

Is Daddy of Harness Drivers

Edward ("Pop") Geers in his 734 year is the daddy and dean of all light harness drivers. During his career he has had both ankles, both legs, one thigh, both arms and several ribs broken in accidents.

Buenos Aires Wild Over Luis Firpo Win

Buenos Aires, July 14.—Tumultuous enthusiasm, the like of which Buenos Aires seldom has seen before, followed the receipt of the news of

Luis Angel Firpo's victory over Jess Willard. Great crowds marched through the streets, shouting and singing and making impromptu torches out of twisted newspapers.

The result was announced here one minute after the referee counted out Willard in the ring at Boyle's Thirty Acres at Jersey City.

Crowds of boxing fans gathered before the newspaper bulletin boards early in the evening. The police were forced to their greatest efforts to maintain order.

The first great demonstration occurred when it was announced that the ringside betting was 2 to 1 in favor of the Argentinean. The crowd roared "Viva Firpo," and sang loudly.

Canada Has A Bumper Wheat Crop

(By United Press)
Montreal, Quebec, July 14.—The largest wheat crop in Canadian history is being predicted. Estimates now run as high as 500,000,000 bushels.

The Dominion Bureau of Statistics is one of the agencies predicting a bumper crop. The total wheat area is 22,169,300 acres, a decrease of 253,295 from last year, but the condition is 106 per cent compared with 95 per cent last year.

There is abundance of moisture and satisfactory growth. The most valuable crop to date was that of 1915 with 396,000,000 bushels, while last year's crop of 364,000,000 bushels was the largest previous figure.

In anticipation of a bumper crop, the Canadian Pacific railroad is adding 60 new engines to its present equipment, as well as 2,000 box cars.

May Build High Arena

New York, July 16.—Tex Rickard plans a big sports arena in New York, where summer and winter pastimes can be held. Similar structures are reported planned for St. Louis, Kansas City, Omaha, Cincinnati, Philadelphia and Pittsburgh.
